HPE BUSINESS COPY EVA SOFTWARE

Storage Replication Software

WHAT'S NEW

- Supports Dynamic LUN/RAID migration
- Large LUN support with snapshots
- Support for VMFS volumes

OVERVIEW

HPE Business Copy EVA Software, an array based application that utilizes a powerfully simple HPE Replication Solutions Manager (RSM) user interface, creates, manages and configures local replication on the full EVA product family to meet business continuity and regulatory requirements. Business Copy EVA shares an integrated management interface with HPE Continuous Access EVA Software. The RSM manages all local and remote replication features across the full EVA array storage family. The combination of the Business Copy EVA Software's unique Snapclone and Vsnap local replication technologies with an unparalleled easy to use RSM interface, businesses now can achieve new IT efficiencies. With

the new Instant Restore capability enterprises can now quickly and easily restore a source volume if it should become corrupted. The flexible and cost effective license model offers a simple means to achieve growth without limits when business needs change.

FEATURES

Simple to Manage and Configure

HPE Business Copy EVA Software uses an advanced management interface, where users can quickly configure and manage local replication with up to 7x less effort.

Quickly restore a Microsoft Exchange or SQL database with HPE Application Recovery Manager solution.

Vsnap, Snapclone and MirrorClone provide fast, non disruptive point-in-time data copies.

Simply assign disk group and RAID to match protection levels to business value. Improve application availability through non-disruptive restore of online volumes.

Improve operations by allowing extended access to non-disruptive, read/writable copies of production data to other users and servers.

Cost Effective Business Continuity Solution

Customers can quickly recover a corrupted Vdisk.

Snapclones provide the unique ability to allow immediate access to clones.

Vsnaps are true space efficient Snapshots that allocate space as needed. Both technologies provide the optimum use of storage capacity.

Accelerated return on investment is achieved through advanced replication technologies that use storage capacity wisely while protecting your applications.

Flexible security model that allows simplified, role based Operating System authentication and user administration with audit capabilities.

Advanced Replication Technology

Customers can create a Vsnap or Snapshot of a source and choose to keep it at the same RAID level, choose a different RAID and place it in a different disk group based on business needs. Snapclones can be presented to different disk groups including FATA.

MirrorClone now allows a user to pre-normalize a mirror and then fracture the mirror to create an instantaneous byte-for-byte clone. MirrorClone also maintains its relationship with the source volume accelerating the re-sync time.

Technical specifications

HPE Business Copy EVA Software

Supported hardware environment	HPE EVA disk arrays
Replication distance	Local
Replication type	array based
Version	N/A
Product Dimensions (metric)	22.23 x 0.64 x 14.29 cm
Weight	0.23 kg
Warranty	Includes one year of HPE Software Support 9 x 5 (software technical support and software product and documentation updates)

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
