HPE CloudOps Software

What's new

- HPE CloudOps Software — advanced is a new solution that delivers unified provisioning, observability and monitoring for private clouds running HPE runtimes and VMware® with no public cloud dependency.
- HPE CloudOps Software — advanced will be offered as single orderable entity, with a single price and priced in units of sockets per year.
- HPE CloudOps Software — advanced will help customers protect their existing investments while providing clear migration path to HPE Morpheus Software — essentials with no public cloud dependency.
- Fully integrated solution for workload lifecycle management - automate, orchestrate, observe and protect.

Overview

For enterprises trying to deploy private clouds and have a unified control plane for management, HPE CloudOps Software — advanced delivers automation, orchestration, provisioning, full-stack observability, and data protection as one socket-priced solution. This helps enterprise IT teams to simplify operations, increase agility, and ensure every workload is optimized, secure, with the right governance controls in place. Automate service delivery, observe every workload in real time, and protect data and services with built-in resilience across any cloud, infrastructure, or application environment.

Designed to orchestrate, observe, and protect workloads throughout their lifecycle, this solution provides real-time visibility, policy-driven automation, full-stack observability, and built-in resilience.

Features

Enable Private Cloud experience with Integrated Provisioning & Observability and Protection

HPE CloudOps Software — advanced comes with set of capabilities that includes run time (HVM & HKS), SDN (overlay networking), automation for private clouds, observability for private clouds, agentic AI - Co-Pilot for orchestration and observability, all with a single metric (socket-based).

Automatically observe all your workloads, no separate installation and configuration of tools and gateways required.

Full topology sync and monitoring: private clouds, clusters, hosts, network devices, storage volumes, and VMs, with their relationships preserved in HPE OpsRamp Software with monitoring and alerting applied automatically.

Seamless cross-launch: bidirectional deep links let operators move between provisioning and observability contextually, in one click.

Log-based alerting: HPE Morpheus Software logs and activity are forwarded to observability platform which enables log-based alerting.

Protect Data with Built-In Resilience, with HPE Zerto Software

HPE Zerto Software helps you simplify the protection, recovery, and mobility of on-premises and cloud applications. Accelerate cyber resilience and reduce data loss and downtime, no matter how apps are distributed across your public, private, and hybrid cloud estate.

Continuous data protection (CDP) for an always-on customer experience while simplifying multi-cloud mobility to protect, recover, and move applications freely across hybrid and multi-cloud environments.

Real-time ransomware detection delivers real-time encryption detection, secure on-premises immutable extended journal copies, and the Zerto Cyber Resilience Vault for all levels of recovery protection.

Automated and orchestrated recovery quickly scales protection and recovery across multiple sites to support recovery point objectives (RPOs) of seconds and recovery time objectives (RTOs) of minutes.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

— **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.

— **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

— **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

GreenLake is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

— Streamline IT Operations across compute, storage, and networking without the chaos

— Unify and secure data, as you move faster

— Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
