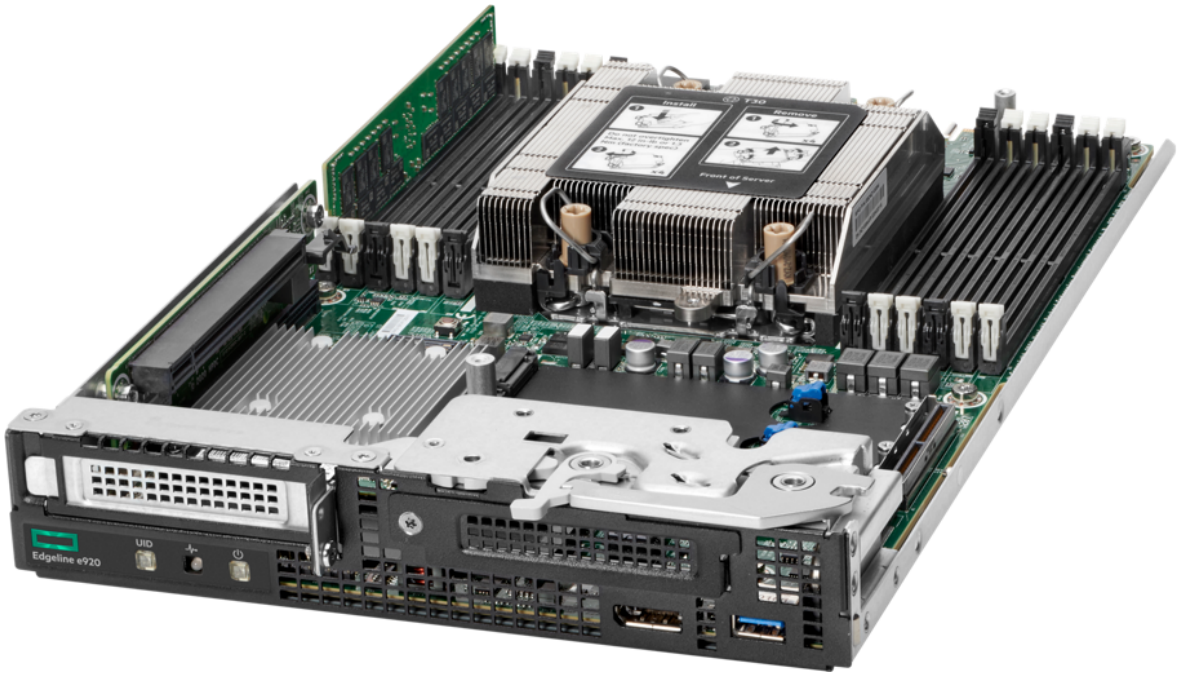
Data sheet

# HPE Compute Edge Server e920



### What's new

- Intel® Xeon® scalable processor family with memory and PCIe
- Intel® VROC (RAID) support on NVMe M.2 Solid State Drives (SSD)
- Persistent memory support
- Four NVMe M.2 drives on motherboard and four additional with optional riser
- 10 GbE network mezzanine option
- Large capacity NVMe M.2 22110 SSD support

## Overview

Do you need a powerful, dense, and rugged server at the edge? The HPE Compute Edge Server e920 is a multi-workload powerhouse designed to deploy edge compute close to where the data is being generated, conserving uplink bandwidth and connectivity cost, lowering security and data risk, and greatly reducing time to actionable insight. Designed to perform in size-, weight-, and power-constrained environments, the HPE Compute Edge Server e920 is the server you need when rugged, dense compute is required. A bladed design allows for easy slide-in, slide-out maintenance and upgrades.

# Features

### Outperform in Ruggedized Edge Environments in Public Sector, Defense, Retail, and More

Leveraging the Intel® Xeon® Scalable processor family, the HPE Compute Edge Server e920 provides a high-performance system enhanced for ruggedized environments. Additional PCIe lanes have enabled a range of I/O options, including powerful GPUs and accelerators.

It is designed to exceed rigorous compliance standards while performing in size-, weight-, and power-constrained environments. Options such as NVMe M.2 SED storage help enable an operating temperature range of 0°C to 55°C and support a highly performant compute solution.

### Improved Customer Success Right Out of the Box with a Full Feature Stack

The HPE Compute Edge Server e920 provides compute density in a 1U, half-width form factor. Combined with the HPE Compute Edge e920d (the 2U variant of this server blade), these blades offer a full suite of supported options to enable edge use cases, including GPUs, networking, storage, and software.

A slide-in, slide-out modular architecture makes upgrades and servicing a breeze. All generations of server blades are fully compatible in the HPE Edgeline EL8000 Converged Edge System, making it easier to run two applications side-by-side or upgrade from an existing system.

### Enhanced Manageability and Security at the Edge

The HPE Compute Edge Server e920 with HPE iLO 5 and the Silicon Root of Trust from HPE mitigate risk in mission-critical edge environments. By leveraging HPE iLO 5 capability, managing your system with health monitoring and firmware management is easy with enhanced security features.

With an expanding environment outside the data center, HPE manageability systems require fewer traditional IT skills, which improves your company's ability to update, configure, and monitor systems from all locations.

| Technical specifications | HPE Compute Edge Server e920 |
|---|---|
| **Storage** | 4 standard NVMe M.2 drives, with an additional 4 NVMe M.2 drives if using mezzanine (optional) |
| **Mechanical and power** | Power options include 1500W 264VAC or 1500W 48VDC |
| **Environmental, shock and vibration** | 0°C-55°C ambient operational temperature (see QuickSpecs for limits applied to highest wattage CPUs) |
| **Built-in I/O** | 1 half-height, half-length (low profile) PCIe Gen4 Slot |
| **Expansion slots** | OCP3.0 Right Riser |
| **Warranty** | 3/3/3 Server Warranty includes three years of parts, three years of labor, and three years of on-site support coverage. Additional information regarding worldwide limited warranty and technical support is available at: https://support.hpe.com/hpesc/public/docDisplay?docId=sd00004309en_us. Additional HPE support and service coverage, to supplement the product warranty, is available. For more information, visit: https://support.hpe.com. |

# HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

## Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

## Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

## Support services

Optimize your entire IT environment and drive innovation.  Manage day-to-day IT operational tasks while freeing up valuable time and resources.

— **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.

— **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

— **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

## Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

## HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject.  Schedule training in a way that works best for your business with flexible continuous learning options

**Defective Media Retention** is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

### GreenLake

GreenLake is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

— Streamline IT Operations across compute, storage, and networking without the chaos

— Unify and secure data, as you move faster

— Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
