

HPE EVA DYNAMIC CAPACITY MANAGEMENT SOFTWARE

Storage Device Management Software

WHAT'S NEW

- Support for the HPE EVA6400 and EVA8400 Enterprise Virtual Arrays
- Expanded Operating System support on RHEL 5 U1 and SLES 10 SP2 for X-64 bit
- Vdisk shrink interoperability with Continuous Access EVA
- Update Warranty support for the EVA SW LTUs from 24x7 to 9x5

OVERVIEW

HPE EVA Dynamic Capacity Management Software (DCM) provides a comprehensive solution that automates storage provisioning and improves capacity utilization for the HPE Enterprise Virtual Array (EVA) family. DCM Software uses advanced automation to “right-size” the supported file system and the EVA virtual disk (Vdisk) storage volume to the needs of an application. This dramatically improves capacity utilization by allowing the administrator to simply specify a capacity utilization range for each Vdisk.

Configuring EVA DCM Software policies takes just seconds with its effortless wizards and advanced automation. The simple "set and forget" provisioning not only reduces the resource cost of ongoing storage provisioning, but also allows for the potential postponement of additional capacity purchases due to increased storage utilization. This reduces the operational costs of powering and cooling unnecessary storage while lowering the enterprise's carbon footprint.

FEATURES

Ability to “Right-Size” the File System and the Storage Volume to the Needs of an Application

File systems and storage volumes are automatically expanded online as application needs increase, or shrink to reclaim unused capacity that can be returned to the disk group for use by other applications.

It takes just seconds to configure, or change policies across multiple volumes. Once they are set, capacity provisioning and reclamation are automatic allowing the administrator to focus on other business critical tasks.

Achieving higher capacity utilization rates reduces the need to purchase additional storage capacity and software licenses. In addition, higher utilization results in less power and cooling requirements by reducing the number of disk drives required.

Improves Capacity Utilization by Simply Specifying a Utilization Range of the Vdisk

The flexible architecture allows the administrator to easily switch between automatic and manual modes to quickly adapt to changing business needs.

Valuable data is protected by integrating host and storage operations during expand and shrink cycles.

Technical specifications

HPE EVA Dynamic Capacity Management Software

Supported hardware environment

HPE Enterprise Virtual Array

Product Dimensions (metric)

22.23 x 0.64 x 14.29 cm

Weight

0.23 kg

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
