Data Center PDU Product of the Year

WHAT'S NEW

OVERVIEW

Looking for a flexible, accurate power distribution solution that

- HPE G2 Metered and Switched Power Distribution Units (PDU) are rated for operating temperatures of up to 60°C (or 140°F).
- Color-coded receptacles on single and three phase models to easily distinguish between the different load segments/phases.
- A hot swappable Network Management Card (NMC) allowing for power to remain distributed with the removal of the management card thus creating zero down time.
- Enhanced environmental sensor options on the G2 Metered and Switched PDUs for monitoring temperature, humidity, intrusion, and water leakage within the rack.
- Choose the optional Locking Power Cord for secure cable retention to both the PDU and target device.

allows metering and switching at the outlet level and supports both local and remote power management?

The HPE G2 Metered and Switched Power Distribution Unit (PDU) provides both local and remote power management with outlet-level power metering and switching. An LCD screen provides local monitoring and alert indications, while remote access and configuration are available through secure Web, SNMP, CLI, or Telnet interfaces. Remote outlet monitoring offers $\pm 1\%$ billing grade accuracy while remote switching capabilities support power on/off functionality to remotely reboot equipment or restrict outlet usage. The G2 Metered and Switched PDU features a low-profile, single-piece design with multiple mounting options and ease of access to rear devices for maintenance. It is compatible with all Advanced and Enterprise Series Racks, as well as with many non-HPE racks using standard button and keyhole mounting.

FEATURES

Local And Remote Power Distribution Management With Billing Grade Accuracy

HPE G2 Metered and Switched Power Distribution Units (PDU) include local and remote access to on/off outlet switching and metering, remotely reboot equipment, or restrict outlet usage.

Remotely access and configure each PDU through secure Web, SNMP, CLI, or Telnet Interfaces with the ability to daisy-chain up to four units to share the same network connection and IP address.

Local access, monitoring, and alert notifications available through new OLED display technology.

Meets IEC 62053-21, Class 1 standards for $\pm 1\%$ or better accuracy in power metering.

Operational capability to 60°C in the rear of the rack ensures continuity of power should rack temperatures spike.

Flexible, Simple Installation and Maintenance

HPE G2 Metered and Switched Power Distribution Units (PDU) feature a low-profile, single-piece design supporting multiple mounting options and ease of access to rear devices for maintenance.

Install PDU units side by side on both sides of the rack with the outlets facing in towards the center of the rack for high density configurations.

Support for integrated power cord retention on all IEC receptacles that work with standard power cords.

Add an optional environmental sensor which can measure air temperature and humidity in the front or rear of the rack, sending alerts over the network based on user-defined thresholds.

Safely and securely manage your IT Equipment

HPE G2 Metered and Switched Power Distribution Units (PDU) offer remote access through industry-first PDU support for 1Gb Ethernet allows power on/off capabilities to remotely reboot equipment or restrict outlet usage.

Supports both Local and LDAP security with multiple access levels to provide enhanced security.

Protects against accidental circuit overload while providing the tools to optimize power management in the rack.

Compatible With a Wide Range of HPE and Non-HPE Rack Solutions

HPE G2 Metered and Switched Power Distribution Units (PDU) are designed to provide complete compatibility with Advanced and Enterprise Series racks.

The PDU is also compatible with a wide range of non-HPE racks using standard button and keyhole mounting.

Designed for vertical/OU rack configurations offering both half and full-height form factors.

Technical specifications

HPE G2 Metered/Switched 3Ph 14.4kVA/CS8365C 40A/208V Outlets (12) C13 (12) C19/Vertical NA/JP PDU

Product Number	P9S21A
Mounting options	OU/Vertical
Outlet type	C-13 and C-19
Power capacity	Greater than10kVA
Power distribution	Three Phase
Number of included PDU sticks	0
Product Dimensions (metric)	26.19 x 197.99 x 13.21 cm
Weight	13.70 kg
Warranty	HPE G2 Metered and Switched Power Distribution Units are supported with a limited 3-year warranty which automatically assumes the HPE service coverage level of any covered HPE ProLiant server in the same rack.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
