

HPE GreenLake for Compute Ops Management

HPE GreenLake for Compute Ops Management Enhanced 3-year Upfront ProLiant SaaS (R7A11AAE)

What's new

- VMware-certified vCenter Server® plug-in module provides server hardware management capabilities, comprehensive monitoring, and firmware updates for HPE servers managed in current VMware® environment.
- For latest feature details visit: [Announcement page](#)

Overview

HPE GreenLake for Compute Ops Management is a secure, software-defined compute management platform to intelligently modernize the compute lifecycle management experience, no matter where compute resides. From secure onboarding to simplifying updates and compliance, to unifying monitoring and management. Put HPE GreenLake for Compute Ops Management to work for you!

Features

Unify Compute Management

Streamlines compute operations through one console to manage your compute infrastructure, wherever it lives, and provides instant access to new services and features as they become available.

Enables HPE GreenLake for Compute Ops Management as the default

management tool.

Secure Cloud Operations

Securely bring cloud agility to your compute infrastructure with multi-level security that spans access, authentication, authorization, and communications to help eliminate any business risk.

Simplify and Automate

Agile lifecycle management speeds time to action with ongoing monitoring, including self-healing capabilities, ability to take bulk actions to update across devices/groups, and automation of firmware baselines and compliance policies.

Onboard devices: Simplify deploying new server hardware from bare metal to configuration. Set BIOS, update drivers and firmware. Label and Group devices for intuitive inventory management and monitoring. Firmware management and compliance:

Quickly set firmware baselines across devices and track compliance. Instantly identify which devices need an update and download only the deltas. Use policies to stage and schedule updates either in a governed or automated manner.

Monitor and manage: Instant at-a-glance views of group and device health and status. Get alerts with recommended actions to take, all from a single console.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The Defective Media Retention (DMR) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. Comprehensive Defective Material Retention (CDMR) allows you to keep all data retentive components.

HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE’s market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
