

HPE GreenLake for Networking

HPE GreenLake for User Experience Insight Service Pack (JN042AAS)

What's new

- Eliminate the complexity and unpredictability of traditional network planning and budgeting by moving to a predictable, all-inclusive and OPEX-compatible monthly subscription.
- Expand network capacity and deploy new use cases without having to obtain additional CAPEX or sign a separate lease agreement.

Overview

HPE GreenLake for Networking is a comprehensive network as a service (NaaS) offering that allows you to consume the HPE Aruba Networking market-leading Edge Services Platform (ESP) in a cloud-like way. Acquire and deploy the latest technology and use cases faster and more efficiently. Overcome traditional budgetary obstacles by combining all required hardware, software, and services in a single monthly subscription with no up-front capital expenditures required. Optimize network performance and security by gaining deeper insight into the network environment. Decommission unneeded network devices securely and sustainably.

- Mitigate security risks and address performance and connectivity issues before they impact end users.
- Ensure the network always ready to support the business with the latest hardware and software feature sets.

HPE GreenLake for Networking service packs are modular unitized networking service offerings. Each Service Pack consists of the required HPE Aruba Networking hardware, software, and service components for the specific use case.

Features

Keep Pace with the Speed of Business

HPE GreenLake for Networking enables you to launch new services and capabilities quickly in a post-Covid world where network planning cycles have been drastically shortened and organizations want to be able to quickly pivot in response to market or business dynamics.

Acquire the latest network technology and deploy new use cases, such as remote work, faster and more efficiently compared to traditional models.

Ensure network upgrades happen when needed with pay-as-you go capabilities.

Gain as a Service Predictability and Flexibility

HPE GreenLake for Networking provides organizations with the ability to adapt to a business environment where change can happen rapidly and capital may not always be available.

Transition from large, up-front capital investments to a subscription-based, predictable, OPEX-compatible cost model.

Gain more flexibility than traditional leasing by easily adding new devices/locations as needed, without needing to sign separate agreements or obtain additional CAPEX.

Lower Risk while Accelerating ROI

HPE GreenLake for Networking ensures a successful NaaS deployment by combining digital insights and solution expertise that optimize network security and user experiences.

Leverage the proven design and operational expertise of HPE Aruba Networking and its partners, derived from thousands of customer deployments.

Maintain complete visibility to your network operations, leveraging digital insights to continually analyze and assess your environment and recognize trends that could influence important changes.

Ensure the organization is maximizing its security and performance through the latest product features, functions, or configurations.
