

HPE IMC Application Performance Manager Software

Что нового?

- Application health and performance monitoring.
- Automatic discovery of applications.
- Fault management for monitored applications.
- Comprehensive reporting of monitored objects.

Обзор

HPE IMC Application Performance Manager (APM) Software offers a view to application availability, allowing administrators to visualize and measure the health of critical business applications and their impact on network performance. It is easy to determine which business process is affected and which application issues to prioritize—all leading to quick and effective troubleshooting.

Provides one user interface offering fault management, and performance monitoring of applications, servers, and databases. It works with IMC Service Health Manager to provide a global assessment of network health.

Функции

Reports Application Availability Through Health and Performance Monitoring

The HPE IMC Application Performance Manager (APM) Software can monitor a variety of applications and servers, including: Windows Server, UNIX servers, Linux servers, databases, application servers, Web servers, mail servers, Web services, and LDAP services.

Provides visualization to traffic flow and performance monitoring by analyzing network health and notifies the IT administrator of any hot spots or bottlenecks.

It includes fault management with a user selectable alarming threshold feature for monitored applications and automatic notification.

Simplifies Application Performance Monitoring Environments

HPE IMC Application Performance Manager (APM) Software streamlines application troubleshooting by consolidating traditional application monitoring with network monitoring with a shared interface and display.

Leverage the IMC APM Software monitoring capabilities by using different protocols like Simple Network Management Protocol (SNMP) and Command Line Interface to better interact with applications.

View application information through application, host, class, and custom monitor views to get different views of an application function.

Comprehensive Reporting of Monitored Objects

The HPE IMC Application Performance Manager (APM) Software provides an in-depth reporting application so administrators can get a historical view of application performance and maintain or improve performance.

Reports can be generated at specified intervals and can be output in a variety of formats.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

GreenLake is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
