

HPE IMC Branch Intelligent Management Software

What's new

- Unified remote resource management.
- Comprehensive configuration management.
- Flexible, with enhanced security features to communicate with devices.
- Zero touch device deployment.

Overview

HPE IMC Branch Intelligent Management System (BIMS) Software is an Intelligent Management Center (IMC) optional module designed to remotely manage [network infrastructure](#) using the TR-069 protocol. IMC BIM Software can manage a large number of branch networking equipment without the limitations posed by traditional remote network management methods such as Telnet, SSH, SNMP, or Web remote login.

Branch network devices can be remotely deployed, configured and serviced. IMC BIMS further simplifies the experience of managing remote networks and lowers the operating costs of network managements.

Features

Simplify Remote Resource and Configuration Management for Branch Network

The HPE IMC Branch Intelligent Management Systems (BIM) Software allows administrators to remotely configure device parameters, update software, reboot and restore the device to factory defaults based on TR-069 protocol.

Devices can be remotely deployed and auto-configured by templates that are sent to the device by the Intelligent Management Center (IMC) to deliver zero touch deployment.

BIM Software automates batch device configuration to reduce the error-prone complexities of the upgrade process.

Devices are identified by serial numbers rather than IP addresses to simplify device identification in a DHCP environment.

Delivers Comprehensive Remote Management in Secured or Private Networks

The HPE IMC Branch Intelligent Management Systems (BIM) Software can communicate and manage devices that are private.

IMC BIM Software also uses HTTPS to securely communicate with or to transfer files to the device.

Technical notes

See the HPE IMC Standard or Enterprise Platform data sheet for the required software environment.

Platform required

HPE Intelligent Management Center Enterprise Software
HPE Intelligent Management Center Standard Software

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
