HPE IMC MPLS VPN SOFTWARE MODULE WITH 50-NODE E-LTU (JF410AAE)

Intelligent Management Software

WHAT'S NEW

- Easily add VPN resources such as provider edges, customer edges, and VPNs.
- See real-time VPN fault and configuration states.
- Analyze VPN traffic statistics and trends.
- Deploy VPN through easy operations.

OVERVIEW

HPE IMC MPLS VPN Manager Software is an HPE Intelligent Management Center (IMC) optional module that provides features for all aspects of Multiprotocol Label Switching (MPLS) VPN management. Features include VPN auto-discovery, topology, monitoring, auditing, resource allocation, and performance evaluation.

Additional features of the HPE IMC MPLS VPN Manager

Software include a traffic engineering component that helps operators monitor an entire network and deliver service quality by distributing appropriate network resources as needed.

FEATURES

Comprehensive VPN Management

The HPE IMC MPLS VPN Manager Software helps network administrators add VPN resources as well as aids in manually adding or automatically discovering VPNs.

You can discover VPN fault and configuration states in real-time and use the service topology to check connections and connectivity status.

Use the Border Gateway Protocol (BGP) deployment function to deploy VPN through easy operations.

Monitor and Analyze VPN Traffic

The HPE IMC MPLS VPN Manager Software delivers traffic statistics and report functions for VPN and service access, providing a way to analyze trends in specific and general terms, deliverable in a variety of visual formats on a periodic basis.

Integrates with the HPE IMC Network Traffic Analyzer (NTA) Software option to analyze VPN traffic flow based on application usage.

Technical specifications

HPE IMC MPLS VPN Software Module with 50-node E-LTU

Product Number	JF410AAE
Differentiator	HPE IMC MPLS VPN Manager (MVM) Software is a module for the IMC platform that provides features for all aspects of MPLS VPN management.
Platform required	HPE Intelligent Management Center Enterprise Software HPE Intelligent Management Center Standard Software
Technical notes	Hardware changes with nodes and VPNs: fewer than 500 nodes, 1 CPU, 2 GB memory - From 500 to 1,000 nodes, dual-core CPU, 3 GB memory - From 1,000 to 2,000 nodes, dual-core CPU, 4 GB memory - From 2,000 to 5,000, 2x dual-core CPUs, 8 GB memory - From 5,000 to 10,000 nodes, 4x dual-core CPUs, 16 GB memory - Recommend managed VPN for fewer than 10,000 nodes. Otherwise, a higher level of hardware is needed.
