

HPE IMC QOS SOFTWARE

Intelligent Management Software

WHAT'S NEW

- Greater bandwidth management as network administrators can organize network traffic.
- Enhanced visibility and control over QoS on network devices.
- Powerful re-allocation of network resources given bandwidth usage.
- Visual picture of application traffic use and bandwidth utilization.

OVERVIEW

HPE IMC Quality of Service (QoS) Software enhances visibility and control over QoS configurations on network devices and helps administrators focus on service planning and optimization of networking resources by providing a rich set of device and configuration management functions.

The IMC QoS Software allows administrators to organize traffic into different classes based on the configuration matching criteria and to provide differentiated services to optimize traffic and allocate network resources.

FEATURES

Control Over Traffic Allows for Better Allocation of Network Resources

The HPE IMC Quality of Service (QoS) Software assists in the management of traffic throughout a network for greater allocation of resources and traffic optimization.

Network administrators can set traffic classification policies in which the traffic is regulated with certain rules like the source address, IP protocol, or the port number of the application so that network resources can be reasonably allocated.

Improve Network Traffic Flow by Building QoS Policies

The HPE IMC Quality of Service (QoS) Software helps administrators understand the network traffic model.

Network administrators can leverage the Network Traffic Analyzer to create QoS policy throughout the complete network.

Configure Devices with QoS Manager

The HPE IMC (IMC) Quality of Service (QoS) Software automatically performs device configuration backups providing uniformity.

Network devices can be standardized and managed uniformly as startup configurations can be compared back to running configurations.

Technical specifications

HPE IMC QoS Software

Differentiator

HPE IMC Quality of Service Manager (QoSM) Software enhances visibility and control over QoS configurations on network devices.

Platform required

HPE Intelligent Management Center Enterprise Software
HPE Intelligent Management Center Standard Software

Technical notes

See the HPE IMC Standard or Enterprise Platform data sheet for the required software environment.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
