

HPE IMC Service Operation Management Software

What's new

- Real-time, accurate configuration database.
- Integration with alarming and configuration center.
- Centralized knowledge base for self-resolution of network issues.
- Complete service operation flow management.

Overview

The HPE IMC Service Operation Manager (SOM) Software platform is an Intelligent Management Center (IMC) module that focuses on operations and management flow to provide full IT lifecycle management adhering to ITIL v3.0 including services like policy design, operation, and configuration improvement.

The IMC SOM Software provides controls, measures, and audit capabilities for configuration changes, fault identification, and recovery, reducing IT manual involvement and cost by allowing end users to recognize known network issues and track service requests.

Features

Lifecycle Management of IT Network Operations

The HPE IMC Service Operation Manager (SOM) Software provides lifecycle management of IT network operations from ticket creation to status checks to execution and resolution.

End users can manage and recognize their own network issues and track service requests, reducing overall IT involvement.

Configuration management allows for the automated and manual setting of control mechanisms and audit configuration changes.

Integration with alarming reduces maintenance by enabling problem recognition, improving network efficiency, stability, and quality.

Customization of Networking Experience

The HPE IMC Service Operation Manager (SOM) Software tailors flow management to operations management based on predefined templates appropriate for an organization.

Leverage a centralized knowledgebase for issue resolution and problem identification.

Easily interfaces between end users and administrators to reduce IT time in both operations and management.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
