

HPE IMC TACACS+ Authentication Manager Software

What's new

- Support for device identification and authentication.
- Comprehensive user and log monitoring.
- Centralized management of all device users.
- Flexible authorization policies.
- Batch upload for device users.

Overview

The HPE IMC TACACS+ Authentication Manager (TAM) Software is an Intelligent Management Center (IMC) optional module that provides basic authentication, authorization, and accounting functions for network devices or IT users in order to deliver network device management security.

The IMC TACACS+ TAM Software can assign users with different privileges, monitor login and command execution operations as well as simplify user management which work with devices that support the TACACS+ protocol.

Features

Easily Identify, Authenticate, and Manage Devices

The HPE IMC TACACS+ Authentication Manager Software supports multiple device access methods like Telnet, SSH, and FTP for increased flexibility.

Supports multiple identity verification methods including ASCII, PAP, and CHAP for greater security.

Uses unified authentication with a light weight assisted protocol (LDAP) server, Windows domain server, or third-party LDAP enabled email system.

Executes granular device control of operator privileges for both assigning the operator's operational limits as well as their power to add, change, and remove functions.

Easily Manage Users and Log Activities

The HPE IMC TACACS+ Authentication Manager Software comprehensively monitors users and automatically adds malicious users into a denylist for further monitoring, auditing, and investigation. User information is archived and the user can be deleted.

Leverage group management for device users through multi-administrator management and perform batch operations on users to speed operations and minimize IT management intervention.

Synchronizes device user information from LDAP systems for latest updates.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
