HPE IMC User Behavior Auditor Software

Что нового?

- Provides user data that enhances network security.
- Comprehensive log collection from devices creates safer networks.
- Ability to export and audit log files to examine for threats.

Обзор

The HPE IMC User Behavior Auditor (UBA) Software provides network administrators the ability to audit the behavior of internal users to solve security challenges. In conjunction with the HPE IMC Access Manager (UAM) Software, the IMC UBA Software is built to adapt to network environment changes.

Among the features especially helpful for network administrators are comprehensive log collections and audit functions which digest information from HTTP, FTP, and SMTP packets.

Функции

Greater Control Over Internal Threats Creates a More Robust Network

The HPE IMC User Behavior Auditor (UBA) Software audits internal devices and users to protect the network from security threats.

IMC UBA Software analyzes user actions to provide data such as websites visited, applications used, bandwidth consumed on a per device basis.

Analyzes a variety of logs containing information on device vendor, OS, and type, forwarded by devices on the network to better detect device threats.

Handle Uncertainty with Powerful Filtering and Probe Strategies

The HPE IMC User Behavior Auditor (UBA) Software utilizes probes to analyze incompatible network data.

Overcome uncertainty by filtering log packets and matching them against set criteria to determine anomalies to check overall network security.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

— **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.

— **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

— **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

GreenLake is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

— Streamline IT Operations across compute, storage, and networking without the chaos

— Unify and secure data, as you move faster

— Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
