

HPE IMC Wireless Services Manager Software

What's new

- Provides support for Hewlett Packard Enterprise Aruba devices.
- Identify necessary inventory with map and bill of materials (BOM) software.
- Identify unwanted network users with Wireless Intrusion Detection (WIDS).
- Import CAD maps and understand the layout of the network.
- Leverage the next phase of Cisco device support.

Overview

The HPE IMC Wireless Services Manager Software provides unified management of wired and wireless networks. It works in conjunction with the Intelligent Management Center (IMC) Software platform adding network management functions into existing wired network management systems such as WLAN device configurations, performance monitoring, radio frequency heat mapping and WLAN service reports.

This IMC Wireless Services Manager Software provides uniformity over a wireless network, even one that is geographically dispersed.

Features

Versatile Wireless Management Allows for More Efficient Network Management

The HPE IMC Wireless Services Manager Software manages a multi-vendor wireless environment, from the Hewlett Packard Enterprise Aruba devices to devices from Cisco.

View both basic and extended performance monitoring for online fat access points (APs), fit APs, and clients.

Configure the WLAN network in a step-by-step manner, making network management much easier and faster.

Stay in the know with wireless service alarms, which promptly alert administrators of faults on the network, based on system log entries set via user-defined rules.

Organized Data and Reports Assist in More Effective Network Decision Making

The HPE IMC Wireless Services Manager Software provides reporting capabilities and summarizes performance data in easy-to-read visual graphs and charts.

Obtain a top down view of the network with robust topology management showing a location view of clients and access points (APs).

View real-time client monitoring information, allowing network administrators to see everyone from approved devices to rogue clients.

Detect any unwelcome visitors to the wireless network with the Wireless Intrusion Detection System (WIDS) and ensure the right visitors are on the network.

More Effective Networks for Better Coverage and a Better User Experience

The HPE IMC Wireless Services Manager Software helps network administrators optimize their networks through radio frequency (RF) and network planning management.

Use the Radio Frequency Management function to understand what obstacles, such as concrete walls and doors, might serve as barriers to a higher transmission rate.

Have peace of mind with network planning management which helps network administrators select AP models and plan AP deployment by analyzing coverage at specific locations prior to purchase.

Automatically detect which APs are connected to a switch's PoE ports, enabling remote management of those PoE ports.

Brings Initial Integration With Hewlett Packard Enterprise Aruba Devices

The HPE IMC Wireless Services Manager Software receives and displays alerts/events from AirWave.

AirWave is launched when a device managed by AirWave is double-clicked on the IMC topology map.

Technical specifications

HPE IMC Wireless Services Manager Software

Differentiator

HPE Intelligent Management Center (IMC) Wireless Services Manager (WSM) provides unified management of wired and wireless networks, adding network management functions into existing wired network management systems.

Platform required

HPE Intelligent Management Center Enterprise Software
 HPE Intelligent Management Center Standard Software

Technical notes

See the HPE IMC Standard or Enterprise Platform data sheet for the required software environment.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The [Defective Media Retention \(DMR\)](#) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. [Comprehensive Defective Material Retention \(CDMR\)](#) allows you to keep all data retentive components.

HPE GreenLake

[HPE GreenLake edge-to-cloud platform](#) is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
