

HPE INFOSIGHT FOR SERVERS

Server Cloud Solutions

WHAT'S NEW

- InfoSight for Servers users with Admin role can now deploy hotfixes on ProLiant Gen 10 servers or later without manually downloading SPP or hotfix components
- Improved login experience with support for Single Sign On (SSO)

OVERVIEW

HPE InfoSight for Servers combines the machine learning and predictive analytics of HPE InfoSight with the health and performance monitoring of Active Health System (AHS) and HPE Integrated Lights Out (iLO) to optimize performance and predict and prevent problems. HPE InfoSight for Servers nearly eliminates wasted time and headaches by transforming how infrastructure is managed and supported. AHS is like a “flight recorder” for your server that provides continuous, proactive health monitoring and recording thousands of system parameters and diagnostic telemetry data 24x7 on the server. HPE InfoSight for Servers analyzes the telemetry data from AHS to derive insights from the behaviors of the install base to

provide recommendations to resolve problems and improve performance. iLO Amplifier Pack functions as an on-premise aggregator and transmitter for HPE InfoSight for servers.

FEATURES

Predict and Prevent Problems

Proactive Resolution: HPE InfoSight for Servers works with Active Health System (AHS) and iLO to predict and recommend solutions for configuration, health, and performance problems across your server infrastructure.

Aggregated Dashboard views: Global Operational and Wellness dashboards for a consolidated view of the status, performance, and health of the server infrastructure including system information, server warranty, support status and recommendations.

Compliance Assessment: Automatic detection of the current Service Pack for ProLiant (SPP) of the server and hotfix notifications based on current version of supported components in the firmware/software inventory.

Global Visibility and Learning

See What Others Can't: HPE InfoSight for Servers sees from the past to the future and across your infrastructure, providing deep health and performance insights across your server.

Servers Get Smarter: Every server gets better and more reliable by learning from the collective insights and experiences of the entire install base.

Support You Actually Like

Support Automation: Automatic support cases are created for a specific set of wellness issues identified for servers covered under a valid warranty/support contract. Cases can also be created manually from within InfoSight.

Rapid Root Cause: HPE support engineers have deep expertise in storage, servers, operating systems, hypervisors and applications. And, since HPE InfoSight already has all the information about the problem and your environment, the root cause for even the most complex issues are quickly identified.
