

HPE IMC IPsec/VPN Manager Software

HPE Networking IMC IPsec VPN Manager Software Module with 25-node License E-LTU (JG144AAE)

What's new

- Reduced VPN setup and management time.
- VPN performance monitoring.
- Comprehensive DVPN deployment and management.

Overview

HPE IMC IPsec/VPN Manager (IVM) Software manages IPsec VPN set-up and traffic. It delivers a total VPN solution, which allows you to construct an IPsec VPN network and effectively monitor the operation and performance of it with a graphical VPN topology in real time to troubleshoot VPN issues quickly.

IMC IVM Software expedites IPsec VPN deployments with easy to use wizards to drive consistency among large scale deployments. It is also critical to deploying Dynamic VPNs by pushing VPN configurations in a consistent manner to reduce errors and accelerate deployment.

Features

Deploy VPNs with Ease

HPE IMC IPsec/VPN Manager (IVM) Software provides auto-discovery and a creation wizard to reduce IPsec VPN creation and management. The wizards help administrators simply and quickly deploy even the most complicated VPN network thereby reducing configuration load and decreasing maintenance costs.

IMC IVM Software accelerates dynamic VPN (DVPN) setup by allowing you to deploy DVPN configuration rules to multiple routers simultaneously. You can also auto-discover an existing DVPN configuration in routers and create a DVPN domain based on the discovery result.

Simplifies Management of Dynamic VPN

HPE IMC IPsec/VPN Manager (IVM) Software provides comprehensive audit capabilities so that you can determine consistency with router configurations and what is set in IVM. You can also audit the DVPN tunnels to determine whether a specific DVPN tunnel is connected.

You can determine the performance of the VPN with IMC IVM Software through the available historic and real-time status monitoring and alerting. You can quickly identify equipment faults or areas where data packet loss occurs.

IMC IVM Software allows you to view your VPN deployments, which are automatically discovered, with a topology view. Administrators can view the VPN deployment, see performance metrics of the device or tunnels, and quickly access configurations from the topology.

Technical specifications	HPE Networking IMC IPsec VPN Manager Software Module with 25-node License E-LTU
Product Number	JG144AAE
Differentiator	Electronic delivery of license for HPE IMC IPsec VPN Manager Software Module with 25-node E-LTU
Technical notes	For the VPN spoke numbers, the following applies: - Fewer than 500 nodes: dual-core CPUs, 3 GB memory, 70 GB hard disk - 500-2,000 nodes: 2 dual-core CPUs, 4 GB memory, 110 GB hard disk - 2,000-5,000 nodes: 4 dual-core CPUs, 8 GB memory, 150 GB hard disk - 5,000-10,000 nodes: 4 quad-core CPUs, 16 GB memory, 190 GB hard disk
Platform required	HPE Intelligent Management Center Enterprise Software HPE Intelligent Management Center Standard Software

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
