

HPE IMC Remote Site Manager Software

HPE Networking IMC Remote Site Manager Software Module with License E-LTU (JG495AAE)

Что нового?

- Comprehensive and efficient remote site management.
- Browser-server model for easy login and monitoring.
- Isolated local network discovery.
- Support for firewalled remote networks.

Обзор

HPE IMC Remote Site Manager (RSM) Software is an HPE Intelligent Management Center (IMC) module that interacts with the hardware platform to deliver centralized management for branch networks regardless of their physical locations, presence of firewalls and Network Address Translations (NAT) devices.

In this model, IMC is deployed at the corporate headquarters and the IMC Remote Site Manager Software is deployed at branch networks, reducing the need for branch devices to support special protocols. IMC and IMC RSM communicate via either HTTP or HTTPS for higher security in your transmissions.

Функции

Comprehensive Management of Branch Networks

The HPE IMC Remote Site Manager (RSM) Software manages firewalled remote networks utilizing Network Address Translations (NAT) or proxy offering flexibility.

Reduces the need for devices in branch networks to support special network management protocols.

Provides centralized advanced security features to agents at remote sites regardless of location for easier network administration.

Manages Each Branch as an Independent Unit

The HPE IMC Remote Site Manager (RSM) Software discovers all entities belonging to a single branch in an isolated fashion, making branch management easier and insulated from each other.

Network administrators can efficiently manage the status of Internet, DHCP, and DNS services for their branch networks.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
