

HPE IMC Wireless Services Manager Software

**HPE Networking IMC Wireless Service Manager Software Module 50
Access Point License E-LTU (JF414AAE)**

What's new

- Identify necessary inventory with map and bill of materials (BOM) software.
- Identify unwanted network users with Wireless Intrusion Detection (WIDS).
- Import CAD maps and understand the layout of the network.
- Leverage the next phase of Cisco device support.

Overview

The HPE IMC Wireless Services Manager Software provides unified management of wired and wireless networks. It works in conjunction with the Intelligent Management Center (IMC) Software platform adding network management functions into existing wired network management systems such as WLAN device configurations, performance monitoring, radio frequency heat mapping and WLAN service reports.

This IMC Wireless Services Manager Software provides uniformity over a wireless network, even one that is geographically dispersed.

Features

Versatile Wireless Management Allows for More Efficient Network Management

View both basic and extended performance monitoring for online fat access points (APs), fit APs, and clients.

Configure the WLAN network in a step-by-step manner, making network management much easier and faster.

Stay in the know with wireless service alarms, which promptly alert administrators of faults on the network, based on system log entries set via user-defined rules.

Organized Data and Reports Assist in More Effective Network Decision Making

The HPE IMC Wireless Services Manager Software provides reporting capabilities and summarizes performance data in easy-to-read visual graphs and charts.

Obtain a top down view of the network with robust topology management showing a location view of clients and access points (APs).

View real-time client monitoring information, allowing network administrators to see everyone from approved devices to rogue clients.

Detect any unwelcome visitors to the wireless network with the Wireless Intrusion Detection System (WIDS) and ensure the right visitors are on the network.

More Effective Networks for Better Coverage and a Better User Experience

The HPE IMC Wireless Services Manager Software helps network administrators optimize their networks through radio frequency (RF) and network planning management.

Use the Radio Frequency Management function to understand what obstacles, such as concrete walls and doors, might serve as barriers to a higher transmission rate.

Have peace of mind with network planning management which helps network administrators select AP models and plan AP deployment by analyzing coverage at specific locations prior to purchase.

Automatically detect which APs are connected to a switch's PoE ports, enabling remote management of those PoE ports.

Technical specifications	HPE Networking IMC Wireless Service Manager Software Module 50 Access Point License E-LTU
Product Number	JF414AAE
Differentiator	Electronic delivery of license for HPE IMC Wireless Service Manager Software Module with 50-Access Point E-LTU
Technical notes	It should be a standalone server that is not on the same server as the IMC platform.
Platform required	HPE Intelligent Management Center Enterprise Software HPE Intelligent Management Center Standard Software

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
