

# HPE Networking Intelligent Management Center QoS Manager License E-LTU (JF408AAE)

---

## What's new

- Greater bandwidth management as network administrators can organize network traffic.
- Enhanced visibility and control over QoS on network devices.
- Powerful re-allocation of network resources given bandwidth usage.
- Visual picture of application traffic use and bandwidth utilization.

## Overview

HPE IMC Quality of Service (QoS) Software enhances visibility and control over QoS configurations on network devices and helps administrators focus on service planning and optimization of networking resources by providing a rich set of device and configuration management functions.

The IMC QoS Software allows administrators to organize traffic into different classes based on the configuration matching criteria and to provide differentiated services to optimize traffic and allocate network resources.

## Features

### Control Over Traffic Allows for Better Allocation of Network Resources

The HPE IMC Quality of Service (QoS) Software assists in the management of traffic throughout a network for greater allocation of resources and traffic optimization.

Network administrators can set traffic classification policies in which the traffic is regulated with certain rules like the source address, IP protocol, or the port number of the application so that network resources can be reasonably allocated.

### Improve Network Traffic Flow by Building QoS Policies

The HPE IMC Quality of Service (QoS) Software helps administrators understand the network traffic model.

Network administrators can leverage the Network Traffic Analyzer to create QoS policy throughout the complete network.

### Configure Devices with QoS Manager

The HPE IMC (IMC) Quality of Service (QoS) Software automatically performs device configuration backups providing uniformity.

Network devices can be standardized and managed uniformly as startup configurations can be compared back to running configurations.

## Technical specifications

## HPE Networking Intelligent Management Center QoS Manager License E-LTU

<b>Product Number</b>	JF408AAE
<b>Differentiator</b>	Electronic delivery of license for HPE IMC QoS Manager Software Module E-LTU
<b>Platform required</b>	HPE Intelligent Management Center Enterprise Software HPE Intelligent Management Center Standard Software
<b>Technical notes</b>	This component can be installed on the same server as the IMC platform. If the SLA module needs to collect large volumes of data, HPE recommends that customers install an SLA collector separately on the secondary server.

## HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

### Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

### Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

### Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

### Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

### HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The Defective Media Retention (DMR) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. Comprehensive Defective Material Retention (CDMR) allows you to keep all data retentive components.

## HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
