# HPE OFFICECONNECT 1950 48G 2SFP+ 2XGT SWITCH (JG961A)

## Fixed Port Web Managed Ethernet Switches

### WHAT'S NEW

- Flexible 10GbE connections-10GBASE-T copper and SFP+ fiber-in an affordable, smart web-managed switch series.
- Four-high stacking can simplify network administration and add resiliency.
- Power over Ethernet models supporting up to 370 Watts total PoE+/PoE power.
- Customized operation using intuitive Web

### OVERVIEW

The HPE 1950 Switch Series is a family of smart web-managed Gigabit switches with 10GbE uplinks for small business customers needing advanced high-performance connections. The series has 2 standard and 2 PoE+ models, 24- and 48-GbE ports, each with 2 10GBASE-T and 2 10G SFP+ high-bandwidth ports.

True stacking of as many as 4 devices allows them to be logically administered as a single entity. The switches support

---

browser-based interface

- Limited lifetime warranty for unit, power, and fans.

Layer 3 static routing on IPv4 and IPv6. Other advanced features include ACLs, 802.1X, STP, RSTP, and MSTP. Limited lifetime warranty covers unit, fans and power supplies.

## FEATURES

### **High-level Gigabit with 10GbE Networking for Advanced Small Businesses.**

Each model of the HPE 1950 Switch Series includes four 10GbE connections to connect to servers, network storage devices, or to other switches.

Two connections of 10GBASE-T deliver 10GbE over copper Category 6a cabling for simple, affordable, high-bandwidth connections to a maximum distance of 100 meters.

Two SFP+ ports allow for fiber connectivity at various distances, at 1/10GbE speeds, using optional SFP+ 10GbE or SFP Gigabit transceivers.

Aggregate 10GbE connections for even higher bandwidth using Link Aggregation Control Protocol.

### **Simplified Network Administration**

Logically group or "stack" as many as four units of the HPE 1950 Switch Series and manage this as a single entity, greatly simplifying network administration. Interconnect stacked units using 10GbE connections, with as much as 40GbE total stacking bandwidth connecting the units.

Use the intuitive web-browser based interface to configure and administer these smart-managed devices.

These devices support SNMP versions 1, 2c and 3, allowing administration of these devices from a remote SNMP-based management platform.

Network Time Protocol facilitates timekeeping across your network so time-based actions and trouble-shooting logs are kept synchronized.

Units will automatically retrieve an IP Address from a DHCP server, allowing for near plug-and-play deployments.

### **Robust Security to Protect Your Network**

The HPE 1950 Switch Series lets you use Virtual LANs and access control lists to set bounds on what data can be seen by which users.

Leverage 802.1X with a RADIUS server to ensure only known and authorized users can access your network.

Multiple features guard your network from user or server spoofing and from malicious network-based attacks.

Help secure management traffic using supported SSL/HTTPS encryption and SNMPv3 capabilities.

### **Resiliency Features to Keep Your Network Running**

The HPE 1950 Switch Series supports Spanning Tree Protocol, Rapid Spanning Tree Protocol, and Multiple Spanning Tree Protocol standards for creating hot-standby recovery links.

Distribute important links across multiple units in a logical stack for added

resiliency. Units can even be in different buildings and still be logically stacked.

Devices support two independent primary and secondary operating system flash images for backup and recovery during unit upgrades.

Power over Ethernet (PoE) models can be paired with an optional Redundant Power System which can maintain power even if the unit's power supply fails, as well as supplement available PoE power up to 780 Watts.

## Technical specifications

## HPE OfficeConnect 1950 48G 2SFP+ 2XGT Switch

<b>Product Number</b>	JG961A
<b>Differentiator</b>	Advanced smart web managed 48-port Gigabit switch with 10G uplinks. This model has 48x 10/100/1000 ports plus two 10GBASE T copper ports and two SFP+ ports for SFP+/SFP fiber connections.
<b>Ports</b>	(48) RJ-45 auto-negotiating 10/100/1000 ports (2) SFP+ fixed 1000/10000 SFP+ ports (2) RJ-45 1/10GBASE-T ports
<b>Memory and processor</b>	128 MB flash Packet buffer size: 3 MB 1 GB SDRAM
<b>Latency</b>	100 Mb Latency: < 5 $\mu$ s 1000 Mb Latency: < 5 $\mu$ s 10 Gbps Latency: < 1.5 $\mu$ s
<b>Throughput</b>	up to 130.9 Mpps
<b>Routing/switching capacity</b>	176 Gbps
<b>Stacking capabilities</b>	Virtual 4 switches
<b>Management features</b>	IMC - Intelligent Management Center Limited command-line interface Web browser SNMP manager HTTPS RMON1 FTP Supported by HPE IMC and generic SNMP management platforms. Refer to documentation for MIB support details.
<b>Input voltage</b>	100 - 240 VAC, rated (depending on power supply chosen)
<b>Operating humidity range</b>	10 to 90% (noncondensing)
<b>Power Consumption</b>	54 W (maximum)
<b>Product Dimensions (metric)</b>	44 x 27 x 4.4 cm
<b>Weight</b>	5 kg

## HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

### Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

**HPE Integration and Performance Services** help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

### Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

**Defective Media Retention** is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

## HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.

If you are looking for more services, like **IT financing solutions**, please [explore them here](#).
