

HPE ONEVIEW GLOBAL DASHBOARD

Converged Infrastructure Management

WHAT'S NEW

- Support for HPE Synergy D3940 drive enclosures as a resource
- Configure NTP servers to be used as a time source
- Reporting for HPE OneView migrated licenses
- Support for remote audit log forwarding

OVERVIEW

Do you have infrastructure that spans across different HPE platforms, data centers, or even countries? HPE OneView Global Dashboard allows you to manage up to 75 HPE OneView or HPE Synergy instances and 20,000 servers across data centers. It helps your IT staff troubleshoot alerts and view core inventory data from one place and make more informed, faster decisions with better infrastructure visibility. With single sign-on, you are one click away from powerful, device-level lifecycle management. At no additional cost, you can simply download and run HPE OneView Global Dashboard alongside HPE OneView, allowing you to see your HPE ProLiant servers, HPE Synergy, HPE BladeSystem, HPE

Apollo, HPE Alletra, HPE 3PAR, HPE Primera, HPE Superdome and HPE Superdome Flex systems as one infrastructure.

FEATURES

Unified View of Infrastructure Across Data Centers in Multiple Locations

The HPE OneView Global Dashboard provides a unified view of the health of HPE servers, profiles, enclosures, HPE Synergy frames, HPE 3PAR, and HPE Nimble Storage systems across multiple appliances for ease of management.

Provides a unified view across multiple versions of HPE OneView and HPE Synergy Composer. HPE OneView Global Dashboard is compatible with all supported HPE OneView releases.

Aggregates critical activities from multiple appliances into a single feed to quickly identify issues occurring on monitored hardware for prompt resolution.

Generates reports for monitored assets to view inventory, including firmware versions as well as compliance that allow you to verify that your equipment meets corporate standards.

One click navigation with single sign-on in context launch of managed resources.

Easy Access to Reporting of Inventory, Health Status, and Licensing

The HPE OneView Global Dashboard delivers reports that make it easy to identify what does not comply with your firmware baseline to accelerate configuration compliance and consistency.

Integrated reporting allows you to see server hardware inventory, including associated firmware versions.

Quickly verify that there are not duplicate resource identification numbers (serial number, World Wide Identifier (WWID)), in your environment.

The licensing report enables you to track used HPE OneView licenses across multiple appliances.

Faster Decisions Enabled by Near Real Time Search Feature

The HPE OneView Global Dashboard has a Smart Search function that delivers access to devices of interest across data centers in seconds for better visibility, enabling you to make faster decisions.

Search for attributes associated with a resource to quickly find and navigate to the desired item.

Easily filter a view down to the set of resources that are having problems, enabling you to focus on only those items that need remediation.
