HPE PLUG-IN FOR SAP NETWEAVER LANDSCAPE VIRTUALIZATION MANAGEMENT FOR STORAGE

Storage Virtualization Software

WHAT'S NEW

- Support for SAP NW LVM v2.0
- Enhanced flexibility in SAP clone/refresh/instance re-location operation by mapping multiple Logical Volumes to multiple physical volumes
- Customers can easily obtain information on

OVERVIEW

HPE Storage plug-in for SAP NetWeaver Landscape Virtualization Management (LVM) is a high-performance and easy-to-use software to manage SAP landscapes in physical, virtual and cloud environments. It enables automation for customers to sync the data in Development, Training and Test environments with the Production environment. It provides a

Volume groups for multiple logical volumes through SAP NW LVM user interface

- Customers can execute SAP clone/refresh/instance re-location operations for SAP instances running on multiple VMware vCenters
- Eliminates user dependency on adding storage array WWN in the mount point configuration
- Available on VMware vSphere 5.1, Windows 2012/2008R2, HP-UX 11iv3, RHEL v6.1/v6.3 and SLES v11.0

complete solution for administrators to make clones and refresh the SAP system/landscapes. The customers can also migrate SAP applications across the physical and virtual infrastructure. This reduces the administrative effort to manage SAP landscapes and improves productivity.

The customers can use this software for HPE 3PAR StoreServ Storage and HPE XP/P9500 Storage running in VMware, HP-UX, Windows and Linux environments with SAP LVM v2.0.

FEATURES

Simplify management of SAP systems and landscapes (traditional and virtualized) on HPE Storage

Enables automation for System Clone and Refresh of SAP Systems/landscapes

Reduces cost, time and effort to operate SAP systems thereby improving productivity

Improves operational continuity and data consistency

Enhances flexibility in making development and test data consistent with Production data

Reduces downtime of SAP systems in production

Enables monitoring of SAP systems, infrastructure metrics and status in real time

Single visualization view to monitor and manage SAP systems

Enables task scheduling and mass operations to meet SLA levels

End-to-end visibility, monitoring, and management of SAP and non-SAP applications in virtual infrastructure

Technical specifications

HPE Plug-in for SAP NetWeaver Landscape Virtualization Management for Storage

Supported hardware environment

HPE 3PAR StoreServ Storage, HPE XP/P9500 Storage
