

HPE PROLIANT DL380 GEN10 4210 1P 64GB 12LFF SERVER FOR CTERA (R0R63B)

Complete Storage Solution

WHAT'S NEW

- CTERA Insight provides comprehensive, real-time monitoring, analysis and management of a CTERA environment to provide full visibility and control over unstructured data across distributed enterprises.
- Complete integration with HPE Nimble Storage dHCI and HPE SimpliVity, unlocking new file use cases for hyperconverged infrastructure.
- Ultra-fast edge-to-cloud transfer protocol that synchronizes data at a throughput of over 30TB/day per site with minimal sensitivity to network latency.
- Built-in migration that enables automated data discovery and import from NAS systems such as NetApp, Dell EMC, and

OVERVIEW

Are you providing users fast, secure access to the corporate file system from wherever they're working?

CTERA and Hewlett Packard Enterprise partner to enable centralized data access from any edge location or device without compromising performance or security. The joint CTERA and HPE platform is the only solution to unify file infrastructure across headquarters, branch, and home. CTERA's software-defined, multi-cloud data management platform enables modern file services across the HPE data storage and hyperconverged infrastructure (HCI) portfolio.

CTERA's global file system technology connects core, branch, and remote users over a single namespace and delivers headquarters-grade performance and security from any edge location or device. It dramatically simplifies the cost, scale, and complexity challenges of traditional file storage solutions for the new era of distributed and remote work IT.

Windows Server with full preservation of folder structure and permissions.

- DevOps tools that enable organizations to automate their file services deployments with just a few lines of code.

FEATURES

Remote Office and Branch Office (ROBO) Modernization | File Server Replacement

Powerful cloud-enabled edge filers that replace traditional NAS and file servers at remote locations and enable distributed enterprises to tier data to low-cost cloud and object storage.

A complete suite of enterprise file services from edge to cloud, including file storage and collaboration, backup and disaster recovery, and advanced cloud caching.

Multisite file sharing and collaboration across a global namespace, traditional ROBO IT storage silos of data are eliminated.

Dramatic ROBO infrastructure consolidation and increased ease of management and savings.

Built-in cloud fail over, allowing IT admins to easily overcome hardware failures and drive user productivity.

Hyperconverged File Services

CTERA and HPE bring the benefits of cloud data management to hyperconverged environments, simplifying edge computing and global file services for distributed enterprises.

CTERA Virtual Edge Filers for HPE SimpliVity delivers a fast, secure, and efficient hyper-converged based solution to consolidate a wide range of edge IT infrastructure and to power enterprise file services from edge to cloud.

CTERA Virtual Edge Filers for HPE Nimble Storage dHCI powers core/data center file use cases, including NAS replacement/modernization; edge data processing; and data protection.

Together CTERA and HPE HCI solutions provide an all-in-one edge storage and compute platform for running virtualized local workloads while enabling dramatic improvements for file access from edge to cloud.

CTERA and HPE HCI solutions dramatically reduce costs through infrastructure consolidation and hyperscale cloud object storage.

Remote Workforce Enablement

CTERA and HPE extend your corporate file system to users working anywhere and empowers them to be highly productive through familiar SMB/CIFS protocols.

CTERA's Virtual Edge Filers and Endpoint solutions connect any number of remote sites and users to a global file system powered by your existing storage infrastructure.

Ensure distributed users stay connected through CTERA's highly optimized data transfer protocol. Help users overcome the last stage of connectivity, reducing WAN traffic to make work from home users feel as though they were in the office.

Maintain your existing security model. Keep your firewall and protect data moving from edge to cloud. Learn why CTERA is trusted by the U.S. Department of Defense and other security-focused organizations.

Private File Sharing and Collaboration

CTERA Drive Share allows enterprise and service provider organizations to deliver modern content collaboration services within the confines of their firewall.

Users can access their files from any device via software clients, mobile apps, and web browsers. Additionally, users can share files ad-hoc and in project teams, synchronize folders between multiple devices, and synchronize the cloud.

CTERA Drive Share eliminates the data privacy and governance concerns associated with public SaaS file sharing solutions.

Technical specifications

HPE ProLiant DL380 Gen10 4210 1P 64GB 12LFF Server for CTERA

Product Number	R0R63B
Protocol supported	SMB, NFS, AFP
Product Dimensions (metric)	8.73 x 44.54 x 73.02 cm
Weight	24.5 kg maximum
