

HPE ProLiant for Microsoft Azure Stack Hub

What's new

- HPE ProLiant DL360 Gen10 server configuration, providing a 1U form factor with same compute and memory options as the current HPE ProLiant DL380 Gen10 server with less rack space required.
- Multiple switch options available for order.
- Orchestrated patch and update process.

Overview

Are you looking for an on-premises private cloud that is compatible with Microsoft® Azure®?

HPE ProLiant for Microsoft Azure Stack Hub is a hybrid cloud solution that allows organizations to run Azure consistent services in their data center, providing a simplified development, management, and security experience that is consistent with Azure public cloud services. The solution enables the easy movement and deployment of applications to meet security, compliance, cost, and performance needs. With HPE ProLiant for Microsoft Azure Stack Hub, you can increase agility by reducing repetition while rapidly provisioning and scaling services. Simplify IT implementation and management by using the same management and automation services you

use with Azure public cloud across the entire Azure Stack Hub environment. Reduce costs and deliver the financial flexibility of Hybrid IT to reduce infrastructure expenditures and operational costs.

Features

Deliver Microsoft Azure-consistent Services on Premises

HPE ProLiant for Microsoft Azure Stack Hub allows companies to run Azure consistent services on premises. They can maintain data sovereignty, run high performance analytics, big data/low-latency applications, support edge/disconnected applications, and deploy applications to private or public cloud.

With HPE Pointnext Services, you can leverage planning, migration, and operation expertise to design and implement your right mix of hybrid cloud.

Joint Hewlett Packard Enterprise - Microsoft Azure Stack Hub Innovation Centers allow you to experience HPE ProLiant for Microsoft Azure Stack Hub first hand. Meet face-to-face with both companies' experts, as well as test your specific workloads on the latest platforms available.

Options for Managed Service or Pay as You Consume Pricing Model

HPE ProLiant for Microsoft Azure Stack Hub is available as a managed service, allowing you to focus more on strategic initiatives versus day-to-day operations.

Implement a pay as you consume model with HPE GreenLake. No capital is needed up front, and no overprovisioning of infrastructure; only pay for what you use.

Most Configurable Solution Available

HPE ProLiant for Microsoft Azure Stack Hub provides configuration flexibility with choice of multiple processor options, memory, scalable storage capacity, and support for 3rd party power supplies, switches and rack options.
