

HPE SN2100M 100GBE 16QSFP28 ONIE POWER TO CONNECTOR AIRFLOW HALF WIDTH SWITCH (R0P82A)

M-series Switches

OVERVIEW

How can you provide fast, reliable, and cost-effective connectivity in the data center with predictable performance and investment protection? HPE M-series SN2100M Ethernet switches are ideal for modern server and storage networks. Supporting port speeds of 1, 10, 25, 40, 50, and 100 GbE, delivering predictable performance and zero packet loss at

line-rate across each port and packet size. Enhanced for storage combined with efficient design, it provides enterprise-level performance with attractive economics and outstanding ROI. Networks built on HPE SN2100M are fast, reliable, and scalable while also being affordable and easy to manage. It supports primary and secondary storage, providing consistently fair, fast, low-latency connectivity even under heavy workloads or a mix of different port speeds. This makes them ideal for storage, hyper-converged, financial services, and media and entertainment deployments.

FEATURES

Superior Performance with Future-proof Growth

HPE M-series SN2100M Ethernet switches provide predictability within a storage network and consistent throughput regardless of the packet size being transferred, the mixture of ports which are sending data and even within mixed speed environments.

Provides wire-rate performance with zero packet loss across frame sizes, avoiding any negative impact on applications that could occur with frame loss as unexpected packet loss is unacceptable in modern data centers, especially within a storage network.

Capable of forwarding 100% capacity wire rate performance with zero packet loss across ports concurrently at 100 GbE speeds while transferring data across both Layer 2 and Layer 3 networks.

Can be deployed to support 10 GbE ports and is designed to be able to evolve over time to support 25, 50, and 100 GbE speeds. This helps future-proof your network architecture and allows for implementing significant speed changes to the architecture over time.

Enhanced for Storage and Hyperconverged Environments

HPE M-series SN2100M switches provide high-port density in a single rack unit, allowing for higher capacity and efficiency, simplifying scale-out environments and saving on total cost of ownership (TCO). Unique breakout cables fan out individual switch ports to multiple device ports.

With unique form factors and port counts, these Ethernet switches allow two HPE SN2100M units to be deployed side-by-side allowing for increased density, making it the ideal top-of-rack (ToR) switch.

Designed to use less electric power than competing switches, with less than 95W, HPE SN2100M provides one of the industry's lowest power draws, producing less heat than competing products and allowing reduced OPEX cost.

Unleashes Flash Storage Performance

HPE M-series SN2100M switches provide ultra-low latency of under 300ns port-to-port. This is advantageous for flash storage, which moved latency from storage access to the network, as well as for the burst nature of today's software-defined and cloud data centers traffic.

Provides enough internal bandwidth that there is sufficient capacity to carry

ports at 100 Gbps bandwidth concurrently. This allows the switches to avoid head-of-line blocking which can reduce overall performance and throughput.

Introduces dynamic shared buffers and wire speed performance with no packet loss for predictable data delivery.

Technical specifications

HPE SN2100M 100GbE 16QSFP28 ONIE Power to Connector Airflow Half Width Switch

Product Number	ROP82A
Port speed	100 Gbps Ethernet, maximum
Aggregate switch bandwidth	3.2 Tbps
Encryption capability	No
Protocol supported	Ethernet
Availability features	Additional ports with upgrade license redundant power supply
Form factor	1U half-width
Upgradability	Flash for convenient OS upgrades
Software (required)	ONYX and ONIE
Software (optional)	HPE SN2100M 100GbE 8p Upgrade E-LTU (Q2M94AAE)
Product Dimensions (metric)	4.39 x 20 x 50.8 cm
Weight	4.53 kg

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
