# HPE SN6000B 16GB 48- PORT/48-PORT ACTIVE POWER PACK+ FIBRE CHANNEL SWITCH (QR481C)

## B-series Switches

### WHAT'S NEW

- New model with a unique Port-side Intake Air flow mechanism (SKU Number E7X99A): This model pulls cooling air in from the port side of the switch and exhausts it out the non-port side.
- New unique bundle model with SFPs - HPE SN6000B 16Gb Bundled FC switch (SKU Number C8R08A) - that simplifies ordering and provides great value to HPE customers.

### OVERVIEW

Are you struggling to keep pace with ever-increasing workloads on a never-increasing budget? While virtualization has provided some relief by enabling the benefits of faster deployment and consolidation, it tends to put additional stress on data center networks.

The HPE B-series SN6000B Fibre Channel Switch meets the needs of hyper-scale, private cloud storage environments by delivering market-leading 16Gb Fibre Channel (FC) technology and capabilities that support highly virtualized environments. Designed to enable greater flexibility and investment protection, the SN6000B switch scales from 24 to 48 ports and supports 4, 8, 10, or 16 Gb/s speeds in an efficiently designed 1U package. It also provides a simplified deployment process and a point-and-click user interface making it powerful and easy to use. It offers low-cost access to SAN technology while providing "pay-as-you-grow" scalability to meet the needs of an evolving storage environment.

## FEATURES

### Flexible Fabrics

The HPE B-series SN6000B Fibre Channel Switch provides high speed 16 Gb/s optimized inter switch links (ISLs) providing twice the performance as previous generation Fibre Channel switches. The net result is there are fewer links, fewer cables, fewer ports and less power for the same performance.

Delivers 128 Gb/s high-performance, resilient frame-based trunk.

Preserves ports for server and storage connectivity and scales from 24 to 48 ports.

### Metro Cloud Connectivity

The HPE B-series SN6000B FC Switch offers operating speeds of 16, 10, 8, and 4 Gb/s offer a wide range of performance for long distance connectivity. Operating the port at 10 Gb/s is also supported over Wave Division Multiplexing (WDM) solutions, such as Dense Wave Division Multiplexing (DWDM).

Integrated Inter-Switch Link (ISL) Compression provides the capability to compress all data in flight, over an ISL which gives you the choice of either moving more data or reducing bandwidth costs.

Integrated Inter-Switch Link (ISL) Encryption provides the capability to encrypt all data in flight, over an ISL. Both encryption and compression can be enabled on the ISL link simultaneously. Enabling ISL encryption results in all data being encrypted as it is sent over a link for added security.

### Operational Simplicity for Administrators

The HPE B-series SN6000B FC Switch provides Diagnostic Ports (D\_Ports) that enable administrators to identify and isolate optics and cable problems, reducing fabric deployment and diagnostic times. Use D\_Ports to run a variety of tests for ports, SFPs, and cables for faults, latency, and distance.

SAN Network Advisor, offered as an option, provides comprehensive management of data center SAN fabrics, including configuration, monitoring, diagnostics, best-practices validation, and management of B-series Directors, Switches, and Host Bus Adapters (HBAs).

### Cloud Optimized Performance and Load Balancing

The HPE B-series SN6000B Fibre Channel Switch provides aggregate 1536 Gb full-duplex throughput and any eight ports can be trunked for 128 Gb Inter-Switch Links (ISLs).

Exchange-based Dynamic Path Selection (DPS) optimizes fabric-wide performance and load balancing by automatically routing data to the most efficient available path.

**Technical specifications****HPE SN6000B 16Gb 48-port/48-port Active Power Pack+ Fibre Channel Switch**

<b>Product Number</b>	QR481C
<b>Port speed</b>	16 Gb/s Fibre Channel
<b>Aggregate switch bandwidth</b>	1536 Gb/s Maximum
<b>Encryption capability</b>	In flight encryption
<b>Protocol supported</b>	Fibre Channel, Routing
<b>Availability features</b>	Hot code load Ports on demand with no downtime
<b>Form factor</b>	1U
<b>Upgradability</b>	Varies by model
<b>Software (optional)</b>	Power Pack+ Software 12-Port Upgrade Integrated Routing, Integrated Fibre Channel Extension Adaptive Networking ISL Trunking Fabric Watch Advanced Performance Monitoring Server Application Optimization, FICON CUP, SAN Network Advisor Professional+ or Enterprise

## HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

### Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

**HPE Integration and Performance Services** help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

### Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

**Defective Media Retention** is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

## HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
