

HPE SN6600B 32Gb 48/24 16Gb Short Wave SFP+ Fibre Channel Switch (R6V47A)

What's new

- QSFP Port On Demand (PoD) kits including a PoD upgrade license, activating 4 QSFP ports, and 4 32Gb QSFP Fibre Channel optics.
- PoD kits including a PoD upgrade license, activating 12 ports, and 12 32Gb Fibre Channel optics.
- 32 Gb short-wave QSFP with break-out capability added.
- New 16Gb or 32Gb transceivers bundled with switches.

Overview

Are you struggling to meet the I/O demands of hyper-scale virtualization, large cloud infrastructures, and growing, flash-based storage environments?

The HPE B-series SN6600B Fibre Channel Switch is a high-performance, ultra-dense, highly scalable, easy-to-use, and NVMe ready enterprise-class storage networking switch delivering Gen6 Fibre Channel (FC) capabilities. It is designed to support data growth, demanding workloads, and data center consolidation in small- to large-scale enterprise infrastructures. Delivering 32Gb to 128Gb performance, customized high port density, and integrated network sensors, it accelerates data access, adapts to evolving requirements, and drives 24x7 businesses. It can scale from 24 to 64 ports with 48 SFP+ and 4 QSFP+ ports, all in an efficient 1U package. In addition, a simplified deployment process and a point-and-click user interface make the HPE B-series SN6600B Fibre Channel Switch easy to use.

Features

Increase Performance for Application and Solid State Storage Architectures

The HPE B-series SN6600B Fibre Channel Switch delivers increased performance through a combination of improved throughput and low latency across 32Gb and 128Gb links in hyper-scale virtualization, large cloud infrastructures, and growing flash-based storage environments.

The onboard ASIC provides up to 566 million frames switched per second and up to 100 million IOPS to meet the demands of flash-based storage workloads.[1]

Port-to-port latency is reduced to 780 nanoseconds (including FEC) through the use of cut-through switching at 32G.[2]

With 48 SFP+ ports and 4 QSFP ports, each providing four 32Gb connections, it can scale up to 64 device ports for an aggregate throughput of 2Tb.

Ultra-dense and Highly Scalable

The HPE B-series SN6600B Fibre Channel Switch scales up to 64 Fibre Channel ports in an efficiently designed 1U form factor, delivering increased port density and space utilization for simplified scalability.

Each of the 48 SFP+ ports supports 4, 8, 10, 16, and 32Gb FC speeds, while each of the four QSFP ports is capable of supporting 128Gb.

Provides flexibility to utilize high-speed 32Gb as well as 16Gb optics on demand to meet growing data center needs and provide backward compatibility to older infrastructures.

Simplified Management with Deep Analytical Insights

HPE B-series SN6600B Fibre Channel Switch combines HPE Power Pack+ software that helps simplify monitoring, improve operational stability, and dramatically reduce costs.

Proactively and non-intrusively monitor storage device IO providing deep insight into problems and improved service level agreements (SLA).

Gain comprehensive visibility into the fabric using browser-accessible dashboards with drill-down capabilities.

Building Block for Virtualized, Private Cloud Storage

The HPE B-series SN6600B Fibre Channel Switch supports multitenancy in cloud environments reducing the number of switches required.

Provides efficient link utilization with up to 64Gb of in-flight data compression over inter-switch links (ISLs).

Internal fault-tolerant and enterprise-class reliability, availability, and serviceability (RAS) features help reduce downtime to support mission-critical cloud environments.

Technical specifications**HPE SN6600B 32Gb 48/24 16Gb Short Wave SFP+ Fibre Channel Switch**

| | |
|------------------------------------|--|
| Product Number | R6V47A |
| Port speed | 32 Gbps Fibre Channel |
| Aggregate switch bandwidth | 2 Tbps, maximum |
| Encryption capability | In-flight encryption |
| Protocol supported | Fibre Channel |
| Availability features | Hot code load, ports on demand with no downtime |
| Form factor | 1U |
| Management features | B-series SAN Network Advisor Integration with Storage Essentials |
| BladeSystem supported | No |
| Upgradability | Varies by model |
| Media types | Supports 32Gb, 16Gb, 10Gb transceivers |
| Ports | 64 maximum |
| Software (optional) | HPE Power Pack+ software, 12-Port Upgrade, Integrated Routing, ISL Trunking, and HPE SAN Network Advisor Professional Plus or Enterprise |
| Product dimensions (metric) | 4.39 x 44 x 35.56 cm |
| Weight | 7.73 kg with two power supply FRUs, without transceivers |

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The Defective Media Retention (DMR) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. Comprehensive Defective Material Retention (CDMR) allows you to keep all data retentive components.

HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
