

# HPE SN8600B 4-SLOT POWER PACK+ PORT SIDE AIR INTAKE DIRECTOR SWITCH CHASSIS (R0Q25A)

## B-series Switches

### WHAT'S NEW

- The HPE B-series SN8700B 64Gb SAN Director is offered with the flexibility of both Non-Port side Intake (NPI) and with Non-Port side Exhaust (NPE).
- HPE SN8700B Director blades are available and fully-integrated with 48 64Gb short wave, 48 32Gb short wave, or 48 32Gb long wave transceivers.
- The HPE SN8700B Director offers reduced latency compared to the previous generation.
- Up to 384 64Gbps line rate ports or up to 512 32Gbps line rate ports for device connectivity. Along with 32 ICL connections for an additional 128 ports for

### OVERVIEW

Are you looking to modernize your storage-networking infrastructure to efficiently meet the dynamic and growing demands of your business?

With more reliable data access and procedures to reduce human error, the HPE SAN Director Switch portfolio delivers a powerful Fibre Channel (FC) and multiprotocol switching infrastructure that can massively scale in a smaller footprint and unleash the full performance of flash and emerging NVMe-based storage.

It provides a mission-critical, scalable, and high-performance foundation for enterprise data centers with private and hybrid-cloud deployments and highly virtualized environments. The HPE SAN Director Switch portfolio contains the HPE B-series SN8700B 64Gb FC Switch and HPE B-series SN8600B 32Gb

---

chassis-to-chassis interconnect.

- Core blade upgrades for the HPE SN8600B Director Switch allow customers to upgrade and unlock the features and 64Gb port bandwidth of the HPE SN8700B Director Switch without replacing their chassis.

FC Switch. The HPE SAN Director is offered in 8-slot and 4-slot chassis providing up to 384 64Gb/s ports or up to 512 32Gb/s with up to 32 QSFP based ICLs equivalent to 128 FC ports.

## FEATURES

### Improved Performance

HPE SAN Director Switch features up to 64Gbps FC performance and up to 31Tbps chassis bandwidth to address I/O and bandwidth-intensive applications for private cloud storage and highly virtualized environments.

Supports flash-based storage workloads with up to 1 billion IOPS utilizing 48-port 64Gb FC blade, 64-port 32Gb QSFP blade, 48-port 32Gb FC blade, and 32Gb SAN extension blade.

Increase scalability with up to 2X throughput for high-density virtual machine (VM) deployments and larger fabrics, allowing organizations to support more storage devices using the same number of FC links. [1]

HPE SAN Director family provides higher chassis, slot-to-slot, and port performance, enabling faster deployment of applications.

HPE B-series SAN Director Switches offer local switching capabilities to verify that data traffic within the same port group does not consume slot bandwidth, increasing the number of line-rate ports.

### Simplified Management

HPE SAN Director simplifies monitoring, management, and diagnostics to avoid problems before they impact operations and it dramatically reduces total cost of ownership (TCO).

HPE SN8700B and SN8600B SAN Directors integrated with HPE Network Orchestrator (NetO) offer greater visibility into your SAN fabric.

The HPE I/O Insight software with 64Gb and 32Gb FC technology enhances visibility into the health of your SAN.

Enables pro-active monitoring of I/O performance and behavior through integrated network sensors, allowing real-time monitoring of NVMe workloads, providing deep insight into problems, and improving service-level agreements (SLAs).

With new automation, organizations can quickly and reliably perform resource intensive tasks, such as provisioning, and enable uninterrupted SAN monitoring, so that tasks can be completed in less time. With automation, organizations can automate repetitive daily tasks and deliver consistent results.

### Improves Business Continuity and Disaster Recovery Solutions

The HPE SAN Director delivers high bandwidth, port density, and throughput required for application performance over WAN connections addressing demanding disaster recovery (DR) requirements through 64Gb, 32Gb FC, and 1GbE/10GbE/40GbE ports.

Reduces bandwidth costs with in-flight data compression at wire speed and increases security with in-flight data encryption.

Provides native 10Gbps FC support on the 32Gb and 64Gb blade.

### Lower TCO

HPE HPE SN8600B 8-slot Power Pack+ Director Switch, HPE SN8600B 4-slot Power Pack+ Director Switch, HPE SN8700B 8-slot Power Pack+ Director Switch, and HPE SN8700B 4-slot Power Pack+ Director Switch seamlessly integrate with NVMe throughout the fabric.

Enables high-density, core-edge, and active-active mesh chassis topologies reducing inter-switch cabling by up to 75%. [2]

To meet ever-increasing demands for faster, more reliable data access, it is essential for organizations to deploy a modernized infrastructure that reduces latency, increases bandwidth, and helps ensure near-continuous availability. Unprecedented performance is not enough on its own.

## Technical specifications

### HPE SN8600B 4-slot Power Pack+ Port Side Air Intake Director Switch Chassis

<b>Product Number</b>	R0Q25A
<b>Port speed</b>	32Gbps Fibre Channel
<b>Aggregate switch bandwidth</b>	Up to 20.48 Tbps depending on blades selected
<b>Encryption capability</b>	In-flight encryption, data at rest encryption, depending on model
<b>Availability features</b>	High availability with redundant hot swappable components, redundant power and cooling subsystems, automatic control processor failover non-disruptive "hot" software code loads, and activation concurrent hardware upgrades.
<b>Form factor</b>	9U
<b>Management features</b>	B-series SAN Network Advisor Integration with Storage Essentials, HPE OneView 1.2, HPE Intelligent Infrastructure Analyzer Software, PowerPack+ Software, Fabric Vision Software, ClearLink diagnostics.
<b>Upgradability</b>	The HPE SN8700B SAN Director is upgradable with 64Gb and 32Gb capable FC port blades and the HPE SN8600B SAN Director is upgradable with 32Gb FC port blades. The HPE SN8600B SAN Extension Blade is supported on both the HPE SN8700B and HPE SN8600B SAN Directors providing FC extension (16×32Gb/s FC ports) and IP extension over IP networks (16×1GbE/10GbE and 2×40GbE ports).
<b>Software (required)</b>	HPE Power Pack+ software comes with the HPE SN8700B and SN8600B SAN Director
<b>Software (optional)</b>	FICON CUP, MP Blade Performance Extension, Enterprise ICL License, and Fabric Vision Software

For additional technical information, available models and options, please reference the QuickSpecs

## HPE POINTNEXT SERVICES

HPE Pointnext Services brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

### Operational Services from HPE Pointnext Services

HPE Pointnext Tech Care provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

HPE Pointnext Complete Care is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

**HPE Integration and Performance Services** help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

### Other related services

HPE Education Services delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

**Defective Media Retention** is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

## HPE GREENLAKE

HPE Greenlake is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
