

HPE STORAGE PLUG-INS FOR VMWARE

Storage Device Management Software

WHAT'S NEW

- New support for vRealize Orchestrator integration with HPE 3PAR StoreServ Storage

OVERVIEW

Managing a virtualized infrastructure can be a daunting task considering the sheer amount of data, innumerable tasks, virtual and physical asset management, and simultaneous processes handled each day. It can prove to be an overwhelming challenge to oversee, maintain, and manage all your virtual machines (VMs), especially when you need to use multiple separate consoles for each operation. What if you could know exactly what was going on in your VMware® environment? HPE Storage Plug-Ins for VMware can provide you with the insight you need to manage your physical storage resources inside of your native and familiar VMware management tools. HPE Storage Plug-Ins for VMware provide

value added management, monitoring, and automation integration for VMware environments through VMware® vCenter™ and VMware vRealize plug-ins that manage HPE Storage systems.

FEATURES

HPE 3PAR Plug-in for VMware vRealize Orchestrator

Provides support for HPE 3PAR StoreServ arrays in VMware vRealize Orchestrator to enable cloud-like IT automation so businesses can provide services faster and more efficiently.

Build workflows to automate simple or very complex tasks to support day-to-day management, decrease time-to-rollout of new services and capabilities, and decrease human error when performing large numbers of operations.

Allows customers to integrate workflows and composites into blueprints within VMware vRealize Automation. You can build and deliver services and resources to end users via a service-catalog-based solution.

HPE OneView for VMware vCenter

Enables the VMware administrator to quickly obtain context-aware information about HPE servers and HPE Storage in their VMware vSphere® environment directly from within vCenter.

Enables VMware administrators to monitor and manage all of their HPE Storage directly from within the VMware vCenter management console. This enables the vSphere administrator to easily manage physical servers and storage, data stores, and virtual machines.

By providing the ability to clearly view and directly manage relationships between virtual machines, and HPE Infrastructure, the VMware administrator's productivity increases, as does the ability to ensure quality of service.

HPE Storage Plug-in for vRealize Operations Manager and Log Insight

Allows VMware administrators to visualize and analyze data from their HPE Storage directly within vRealize Operations Manager to quickly view storage capacity, performance and health information and troubleshoot scenarios that span across virtual and physical layers.

Collects and analyzes performance data using self-learning analytics and correlates abnormalities to help troubleshoot potential problems and quickly identify the root cause to ensure consistent, predictable quality of service.

Delivers real-time log management for VMware environments, with machine learning-based Intelligent Grouping, high performance search and better troubleshooting across physical, virtual, and cloud environments.

HPE 3PAR Storage Replication Adapter (SRA) Software for VMware Site Recovery Manager (SRM)

Integrates HPE 3PAR StoreServ Remote Copy replication software with VMware SRM to provide a foundation for disaster recovery and business continuity solutions.

HPE 3PAR SRA software orchestrates storage replication provided by the HPE

3PAR Remote Copy and HPE 3PAR Virtual Copy software to ensure the highest performing and most reliable disaster protection for virtualized applications.

Allows for centralized management of recovery plans, non-disruptive testing, and automated site recovery, failback and migration processes.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
