HPE STOREFRONT REMOTE SOFTWARE

Storage Device Management Software

WHAT'S NEW

- Proactive analytics include capacity utilization forecasts, key read/write performance wellness checks, co-related system history, and system health email notifications.
- Predictive analytics for capacity efficiency, tiered capacity/CPU Utilization trends, license analytics, and software recommendations for HPE 3PAR and HPE StoreOnce.
- Reporting and monitoring capabilities

OVERVIEW

Are you wondering if the capacity in your Hewlett Packard Enterprise Storage array is running low or if your system's performance can continue to meet your applications' increasing demand? HPE StoreFront Remote is a Hewlett Packard Enterprise storage analytics platform designed to help you make better data center decisions. It complements the Hewlett Packard Enterprise on premises management solutions by providing insights and analytics into the storage infrastructure to help you plan better for growth, be proactive in identifying incorrect configurations and older versions of firmware and software. It also keeps you informed about the wellness status of your HPE Storage and in turn helps utilize

include system health/front end performance, system wellness status/alert history/email notifications, disk details, CPU utilization and HPE File Persona details.

- Enhanced search and intuitive (both custom and user created) filters.

your HPE Storage Arrays more efficiently.

FEATURES

Insightful Analytics to Gain Unique Data Center Insights in One Place

HPE StoreFront Remote provides information about capacity, performance and other key indicators for all of your registered HPE 3PAR StoreServ, HPE StoreOnce, and HPE StoreVirtual systems.

Make better data center decisions by using the powerful and intuitive capacity trend analysis, performance trend analysis, and capacity forecasting capabilities.

Detect anomalies and address them by correlating attributes like by configuration changes, performance information, and support case history.

Advisories to Make the Most out of your Storage Infrastructure

HPE StoreFront Remote provides recommendations and remediation actions to help increase your asset utilization and to enhance your Hewlett Packard Enterprise storage environment.

Get the most out of your infrastructure with system wellness email notifications that encompass health alerts and best practices information based on Hewlett Packard Enterprise recommendations.

Choose the types of notifications and the frequency at which the wellness notifications stay relevant.

Proactive Services Fix Problems Before They Occur

HPE StoreFront Remote enables Hewlett Packard Enterprise to deliver Proactive Services in an effective way to help you to improve the return on your investment.

Get faster resolution from specially trained, solution-oriented advanced resources who manage an incident from start to finish, give recommendations for firmware version and software patches and identify risks and issues through proactive scans.

Monitor your Hewlett Packard Enterprise array with system statuses to the SFRM portal, as well as predictive trend graphs for storage capacity, system health checks, and more.

Easy to Use Interface for Anytime Access to your HPE Array

HPE StoreFront Remote has an easy-to-use graphical user interface (GUI) that is consistent with HPE 3PAR StoreServ Management Console (SSMC), HPE Service Processor and HPE OneView for simplicity of use.

Choose exactly what you want displayed with a customizable dashboard.

Register and monitor as many HPE Storage systems with the HPE StoreFront Remote platform.
