

HPE SYNERGY 4-PORT FRAME LINK MODULE (876852-B21)

Synergy Frame Options

WHAT'S NEW

- Hardware Root of Trust prevents tampering by detecting and validating that the correct firmware is in use on the HPE 4-port Frame Link Module.
- Secure Start maintains secure firmware updates and attack resilience by validating any new firmware on the HPE 4-port Frame Link Module from the previous firmware before switching the boot path.

OVERVIEW

Do your datacenter systems provide continuous uptime with security – while allowing for future growth?

HPE Synergy Frame Link Modules provide basic management functions for HPE Synergy Frames like auto-discovery of resources and health-status monitoring to keep your systems up and running. Security is enhanced by separating the data network from the management network and by a variety of capabilities like Hardware Root of Trust, Secure Start, and Trusted Platform Module (TPM) file encryption. HPE Synergy

- File Encryption uses the Trusted Platform Module (TPM) on the HPE 4-port Frame Link Module for robust device security using validated encryption keys.
- HPE 4-port Frame Link Modules provide flexibility for long-distance connections (up to tens of kilometers) to scattered frames and to remote subnets of a data center.

Frame Link Modules also link multiple frames together into a management ring to scale your single management environment for future growth (up to 21 frames).

FEATURES

Control and Manage your Synergy Frames for Continuous Uptime

Collects asset and inventory information of all components installed in a HPE Synergy Frame.

Auto-discovers all resources in all linked HPE Synergy Frames, and reports this information into HPE OneView in order to automatically bring these resources under monitoring.

Controls and monitors the thermal and power infrastructure resources in an HPE Synergy Frame.

Reports the health status for each component installed in a HPE Synergy Frame. Hosts the HPE Synergy Console user interface.

Extend your Connectivity within a Single Management Domain

Management network connections, which are separate from the data network, operate at 1 Gbps or 10 Gbps for dedicated management control.

HPE Synergy Frame Link Modules link multiple frames together at 10 Gbps into a management ring within a single management domain.

Frame link modules allow you to easily grow your environment from a single frame up to 21 frames within the same management domain.

HPE Synergy 4-port Frame Link Modules provide flexibility for long-distance connections (up to tens of kilometers) to scattered frames and to remote subnets of a datacenter.

Maintain the Security of your HPE Synergy Frames

HPE Synergy Frame Link Modules separate the data network from the management network to resist Denial of Service (DoS) attacks.

Hardware Root of Trust in HPE Synergy 4-port Frame Link Modules prevent tampering by detecting and validating that the correct firmware is in use.

Secure Start maintains secure firmware updates and attack resilience by validating any new firmware on the HPE 4-port Frame Link Module from the previous firmware before switching the boot path.

File Encryption uses the Trusted Platform Module (TPM) in the HPE Synergy 4-port Frame Link Module for robust device security using validated encryption keys.

HPE Synergy Frame Link Modules also provide other security capabilities like secure protocols and algorithms (CNSA Suite B, FIPS 140-2 Level 1, PCI-DSS compliance, GDPR), audit logs, authenticated updates, certificate management, scope based access control, and secure erase of user data.

Technical specifications**HPE Synergy 4-port Frame Link Module**

Product Number	876852-B21
BladeSystem supported	Synergy 12000 Frame
Management features	One Ethernet LINK port @ 10Gbps, One Ethernet MANAGEMENT port @ 1/10 Gbps, Two Appliance ports @ 10Gbps, One USB 2.0 port
Power availability	USB type-C connector is current-limited to 3A at 5V.
Product Dimensions (metric)	Height: 20.8 mm Width: 82.55 mm Length: 286.22 mm
Weight	0.63 kg
Warranty	3/3/3 warranty covers 3 -year parts, 3-year labor, and 3-year onsite service.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
