

HPE SYSTEMS INSIGHT MANAGER (SIM)

Insight Foundation Software

WHAT'S NEW

- Support for HPE ProLiant Gen10 Servers.
- Support for iLO5 1.20, VC 4.70, OA 4.80.
- HPE SUM 8.2 support.

OVERVIEW

Do you need help increasing your system uptime and health? One of the easiest, simplest, least expensive solutions is HPE Systems Insight Manager (HPE SIM). It allows you to manage your hardware across a wide variety of Hewlett Packard Enterprise servers, including the HPE ProLiant Gen10 Servers and HPE ProLiant Gen9 Servers, as well as storage and networking products. With HPE SIM you can manage your contracts and warranties and automate remote support via HPE Insight Remote Support. HPE SIM allows you to monitor the health of your HPE ProLiant Servers and HPE Integrity Servers, and also provides you with basic support for non-Hewlett Packard Enterprise servers with software discovery. When you integrate HPE SIM with HPE Insight Control and HPE Matrix Operating Environment, you can proactively manage your physical and virtual server health, deploy servers quickly, decrease power consumption, and improve your infrastructure with capacity planning.

FEATURES

Inventory Management and Reporting

The HPE Systems Insight Manager software discovers and identifies devices, and provides access to inventory data in a database.

Generate pre-defined reports or create your own reports. You can edit, copy, and delete report configurations.

Schedule reports and have them emailed to you as needed.

Obtain contract and warranty reports when you integrate HPE SIM with HPE

Insight Remote Support.

Health Management

The HPE Systems Insight Manager provides proactive notification of actual or impending component failures.

Allows IT to configure policies to execute scripts, forward events, and notify appropriate users of failures.

Enables Agentless Health Management for the HPE ProLiant Gen10 Servers and HPE ProLiant Gen9 Servers.

Firmware and System Software Updates Management

Integrate HPE Systems Insight Manager (HPE SIM) with HPE Smart Update Manager for agentless firmware update distribution.

Configure, track and manage baselines without the need of an agent installed on the managed system.

Advanced Management with Plug-ins

Perform comprehensive management for HPE ProLiant and BladeSystem Servers when you use HPE Insight Control with HPE Systems Insight Manager. For detailed information on HPE Insight Control, go to www.hpe.com/info/insightcontrol.

Analyze and optimize your adaptive infrastructure to accelerate complex IT projects and simplify daily operations when you use HPE Matrix Operating Environment with HPE SIM. For detailed information on Matrix Operating Environment go to www.hpe.com/info/matrixoe.
