

HPE TELCO BLUEPRINTS

Network Functions Virtualization (NFV)

OVERVIEW

HPE Telco Blueprints are validated reference configurations based on HPE infrastructure platforms and partner-sourced virtual infrastructure manager (VIM) offerings that are customized for specific NFV use cases. These blueprints are offered with automated configuration toolkits and documentation to simplify the install and build of the NFV infrastructure stack.

FEATURES

Enhanced for Every Layer of the NFV Infrastructure Stack

Scalability via modularity.

Reliability with no single point of failure.

Accelerated performance.

Leverages HPE NFV Best Practices

Utilizes automated deployment and configuration of the NFVI stack to help reduce complexity and eliminate human error.

Incorporates infrastructure as code principles.

High availability design for telco workloads.

End to End Carrier Grade Performance

All system components are NEBS level 3 certified.

Tuned with optimal BIOS and NIC configurations.

NIC and storage performance characterization.

Multi-vendor Components and Support for Open Platform Management

Designed and validated with close technical collaboration from leading VIM and SDN partners.

Supported by HPE's broad ecosystem of system integrator and technology partners.

Incorporates open industry standards such as Redfish API.
