

HPE VIRTUAL CONNECT ENTERPRISE MANAGER SOFTWARE

Virtual Connect Management

WHAT'S NEW

- HPE Virtual Connect Enterprise Manager version 7.6 supports Virtual Connect FW 4.50

OVERVIEW

Tired of configuring each Virtual Connect module over and over?

HPE Virtual Connect Enterprise Manager centralizes connection management and workload mobility for HPE Blade Servers that use Virtual Connect to access LANs, SANs and converged network infrastructures. It increases productivity and reduces operating costs by allowing data centers to respond faster to workload and configuration changes.

Built on the Virtual Connect architecture, it provides a central console to administer network address assignments, perform group-based configuration management, and rapidly deploy and move server connections for 250 Virtual Connect domains (up to 1,000 BladeSystem enclosures and 16,000 blade servers).

Virtual Connect and Virtual Connect Enterprise Manager create a change-ready infrastructure management allowing system administrators to add, replace and recover servers across the data center in minutes without impacting network configurations or availability.

FEATURES

Increases Productivity in Multiple Environments.

HPE Virtual Connect Enterprise Manager reduces unnecessary and disruptive production downtime by temporarily moving server workloads to alternate enclosures/bays during server maintenance. Responds faster to change, reducing time, cost and risk.

Renders quick movement of blade server profiles between enclosures, both within or between Virtual Connect Domain Groups.

Automates multiple module operations within the CLI and the API for tighter integration.

Whenever there is a critical event from a server, automates profile failover to a server in the spare pool with Systems Insight Manager (SIM) integration.

Catalyst for Agile Environment

The HPE Virtual Connect Enterprise Manager handles add, modify and failover server connections and their workloads in minutes without impacting LANs and SANs.

Simplifies the migration of servers from test to production.

Limits management overhead, configuration errors, and operating costs.

Offers the Capability to Provide a Flexible Environment and Deploy the Resources Quickly.

The HPE Virtual Connect Enterprise Manager simplifies server deployment or movement with per enclosure licensing, avoiding the need to assign licenses to new servers.

Removes complexities, automates repetitive tasks, and avoids configuration errors.

Enables addition of new or bare metal enclosures and configures Virtual Connect domains quickly by assigning to a domain group.

Assigns a set of enclosures (Virtual Connect domain group) to a particular employee group or application category to maintain consistent configuration.

Reduces Management Costs by Simplifying Management.

The HPE Virtual Connect Enterprise Manager manages network connections and workload mobility for 250 Virtual Connect domains (designed to support up to 1,000 BladeSystem enclosures and 16,000 server blades when used with Virtual Connect multi-enclosure domain configurations).

Provides smooth deployment, movement, and failover of server connections and workloads across the data center.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
