HPE XP BUSINESS COPY SOFTWARE

Storage Replication Software

WHAT'S NEW

- Now available on the HPE XP20000 Disk Array - Make local copies of your critical XP20000 data with HPE XP Business Copy Software.

OVERVIEW

HPE XP Business Copy Software is a local replication solution that provides data copies within a single XP Disk Array, or in storage systems attached to an XP Disk Array as external storage. HPE XP Business Copy Software uses array-based replication technologies that do not interfere with host-level operations, allowing customers to spend time conducting business rather than worrying about how backup and testing operations will impact your systems.

Providing both snapshots and mirrors, HPE XP Business Copy Software reduces the cost of backups, accelerates recovery from failures, provides deployment flexibility, and simplifies

application testing. Create full copies in physically separate locations within the array so that accesses to the copy will have no impact on the original production volume. Use the space-efficient snapshot capability to create frequent point-in-time copies of important volumes so that you can quickly restore data to an earlier version if necessary.

FEATURES

Manage Data Availability Requirements for your Business without Compromising on Performance

Maintain multiple copies of critical data at local and remote sites, allowing recovery from planned and unplanned downtime. HPE XP Business Copy Software integrates with HPE XP Continuous Access software to provide this extra measure of confidence that your data will be available when you need it.

You can create multiple copies of production data and make them available to backup applications. While the backup application utilizes the copy, the primary data remains available for the production application. Production applications continue with minimal impact from the backup process.

Both HPE Storage Data Protector Software and VERITAS NetBackup have been tightly integrated with HPE XP Business Copy Software to provide zero downtime and split-mirror backup solutions for XP Disk Arrays in a variety of server environments.

With the snapshot feature you can create regular point-in-time copies of production data, permitting fast disk-based restores in the event of any problems with the primary data.

Manage Replication Across Internal or External Storage to Gain Cost Efficiency

Create separate copies of production data that can be independently accessed and modified without affecting production data. Copies can be used as source data to test new applications before introducing them to production.

One product provides multiple capabilities. You can mirror open systems volumes, mirror mainframe volumes, and you can create snapshots of open systems volumes, all in one convenient cost-effective product.

Quickly and easily understand complex data replication environments with HPE XP Replication Monitor Software, a centralized web-based replication management tool. For enhanced ease of use, HPE XP Replication Monitor Software is tightly integrated with HPE XP Command View Advanced Edition.

You can use HPE XP Business Copy Software with external storage, providing flexibility to choose the performance and cost characteristics of data copies.

Technical specifications

HPE XP Business Copy Software

Supported hardware environment	HPE XP Disk Arrays
Replication distance	Local
Replication type	array based
Warranty	HPE warrants only that the Software media will be free of physical defects for a period of ninety (90) days from delivery

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE GreenLake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
