HPE XP CONTINUOUS ACCESS SOFTWARE

Storage Replication Software

WHAT'S NEW

- HPE XP Continuous Access Software is now available for the HPE XP20000 Disk Array

OVERVIEW

HPE XP Continuous Access Software provides real-time array-to-array data replication for HPE XP Disk Arrays. This software is part of HP's comprehensive suite of business continuity and availability solutions that enable you to maintain constant access to your data, even if access to a site is lost. HPE XP Continuous Access Software products are integrated with server clustering software solutions to provide the highest levels of availability and disaster tolerance. To protect your business from disasters of any size, whether local or wide-area, you can create 3 Data Center

disaster recovery solutions, with one data center located a continent away. And if you simply need to move data from one location to another, or from one generation of HPE XP Disk Array to another, HPE XP Continuous Access Software provides a reliable high-performance data migration solution.

FEATURES

Achieve High Data Availability for your Most Critical Data Easily and Efficiently

Maintain operations in times of crisis by keeping on line copies of your critical data at alternate data centers.

Coordinate server cluster node failover/ failback with storage failover/ failback so that your applications can continue without disruption in the event of a failure.

Protect your business from both local and wide-area disasters, by using HPE XP Continuous Access Journal in combination with XP Continuous Access Synchronous to provide two simultaneous copies of the same source data, and create a three-data-center disaster recovery solution.

Simplify data center moves and storage system upgrades by using HPE XP Continuous Access to migrate data between sites and between HPE XP Disk Array families. Combine XP Continuous Access Software with XP External Storage to migrate data between a variety of dissimilar arrays.

Choose a Cost Effective Replication Technology as per your Business Requirements

Save money on monthly telecommunication costs with HPE XP Continuous Access Journal. Because it uses a high-capacity disk-based sidefile, HPE XP Continuous Access Journal allows you to size telecommunication links closer to the average I/O rate, and you can tolerate longer link outages.

Choose the remote replication technology that meets your performance, telecommunication link, and data currency requirements. You can choose between HPE XP Continuous Access Synchronous, HPE XP Continuous Access Asynchronous, and HPE XP Continuous Access Journal.

You can use array-based replication in your mainframe environment. Mainframe versions of the remote replication products are bundled in with the open systems titles.

Technical specifications

HPE XP Continuous Access Software

Supported hardware environment	HPE XP Disk Arrays
Replication distance	Remote
Replication type	array based
Warranty	HPE warrants only that the Software media will be free of physical defects for a period of ninety (90) days from delivery.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
