

HPE XP FOR FLASHCOPY SOFTWARE

Storage Device Management Software

WHAT'S NEW

- HPE XP for FlashCopy Mirroring Software is now available for the HPE XP20000 Disk Array.

OVERVIEW

HPE XP for FlashCopy Mirroring Software enhances data availability for mainframe data and improves productivity by providing IBM FlashCopy compatible point-in-time copies within an HPE XP Disk Array. As soon as a copy is created, it becomes available for use. The copy can be either virtual or physical. If a virtual copy is specified, it remains a pointer-based copy that only saves the changes from the original. However, if a physical copy is specified, a full copy will be completed in the background while both the source and the copy remain available for access.

For additional availability, FlashCopy can be combined with

Hitachi ShadowImage for Mainframe, Hitachi TrueCopy for Mainframe, Hitachi Universal Replicator for Mainframe, and HPE XP for Compatible Extended Remote Copy.

FEATURES

Featured Characteristics

HPE XP for FlashCopy Mirroring Software enhances data availability by providing additional local copies of important information.

HPE XP for FlashCopy Mirroring Software improves productivity by creating instantly available point-in-time copies of production data for backup, testing, or for use by other applications.
