

# HPE XP7 Automation Director Software

---

## What's new

- In addition to automating storage provisioning task, HPE XP7 Automation Director can automate infrastructure management tasks such as fabric and virtual machine operations for improved IT efficiency.

## Overview

Are you looking for ways to improve the efficiency of your storage IT staff? HPE XP7 Automation Director software is the answer to unlocking the full potential of your team. It utilizes a service delivery automation engine that catalogs routine and repetitive tasks, as well as advanced processes, for quick, repeatable, and predictable storage service delivery. This software enables an innovative approach to storage infrastructure management. Automatically or with a few clicks of the mouse, quickly provision, replicate, analyze, and customize your environment. It comes with a service catalog of pre-optimized templates using proven best practices. Templates are customizable using Service Builder to tune for your workloads, such as SAP®, Microsoft®, Oracle®, OpenStack®, and VMware®. Intelligent automation with HPE XP7

Automation Director software simplifies storage infrastructure management, improves productivity, reduces cost, and frees up resources for strategic innovation.

## Features

### Automated Storage Provisioning

HPE XP7 Automation Director software replaces repetitive time-consuming tasks and complex workflows with easy-to-use templates. Provisioning becomes completely automated or as simple as a few mouse clicks.

Human error is often a leading contributor to downtime. HPE XP7 Automation Director software reduces human error by replacing mundane repetitive tasks with a service template for repeatable, reliable, and predictable outcomes. Provision automatically, and with confidence.

In addition to automating storage provisioning, further improves IT efficiency by using HPE XP7 Automation Director node license to unlock automation of associated fabric and virtual machine operations.

### Provision Quickly Utilizing Service Catalog

HPE XP7 Automation Director software reduces complexity and accelerates provisioning by providing a pre-populated catalog of templates that were created using known best practices across a variety of common workloads.

Responds rapidly to additional requests for storage, even if it's for an application new to the environment. For example, if the request is for a virtualized environment, select and deploy a template from the HPE XP7 Automation Director software Service Catalog with best practices based on VMware.

### Customize Templates From Scratch Utilizing Service Builder

HPE XP7 Automation Director software comes with a robust catalog of pre-defined templates, but sometimes a new application needs a slightly different workflow. Service Builder, included with the software, contains tools needed to modify an existing template and then create a new catalog entry.

The Service Builder tool, included with the software, contains everything needed to create workflow templates from scratch. Use Service Builder to create a totally custom workflow template connecting resources in your environment for a simple, repeatable, high-quality provisioning experience.

## HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

### Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

### Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

### Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

### Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

### HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The Defective Media Retention (DMR) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. Comprehensive Defective Material Retention (CDMR) allows you to keep all data retentive components.

## HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
