

HPE XP7 HIGH AVAILABILITY SOFTWARE

Storage Device Management Software

WHAT'S NEW

- The XP7 High Availability software enhances the high availability by eliminating quorum disk point of failure.
- The High Availability between XP7 arrays continues even when quorum disk fails.

OVERVIEW

Are you looking for extreme high availability for your most critical HPE XP7 Storage applications?

HPE XP7 High Availability Software is an Active-Active high availability solution offering on HPE XP7 Storage. The high availability (HA) feature is implemented based on the XP7 Multi-Array Virtualization capability supporting two use cases: Active-Active HA and Active-Active Access.

Active-Active HA provides almost 100% storage up-time even

when an array and/or entire data center goes offline. Active-Active Access provides non-disruptive, transparent VM and/or clustered application manageability between hosts or servers at the same or different sites. HA can be combined with any of the other traditional mirroring program products like Business Copy and Fast Snap to make additional copies. HA requires a Quorum device located in an external storage device.

FEATURES

Extreme High Availability (HA) for the Critical Applications in the Event of Array Failure

The HPE XP7 High Availability Software provides almost 100% storage up-time from a disaster recovery (DR) configuration even when an array or entire data center goes offline.

High availability (HA) can be combined with any of the other traditional mirroring program products like HPE XP7 Business Copy Software and HPE XP7 Fast Snap Software to make additional copies.

Active-Active Access for Mobility

The HPE XP7 High Availability Software provides Active-Active Access providing non-disruptive, transparent VM and/or clustered application mobility between hosts or servers at the same or different sites.

Host can use generic multi-path solutions for Active-Active Access, load balancing as the Virtual Storage Machine hides and handles HA complexity.

Technical specifications

HPE XP7 High Availability Software

Supported hardware environment	HPE XP7 Storage
Replication distance	Local
Replication type	Array based
Warranty	Hewlett Packard Enterprises warrants only that the Software media will be free of physical defects for a period of ninety (90) days from delivery.

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
