OVERVIEW

What if you could safeguard your business with enhanced security? Improve the efficiency and productivity of your organization? The Hewlett Packard Enterprise and Microsoft® partnership combines technologies to help your business reach its full potential and operate with increased agility, extra layers of security, higher resiliency and performance for your Windows® based servers. Microsoft Windows Server 2016 is the cloud-ready operating system that supports your most demanding workloads while introducing new technologies that make it easy to integrate hybrid cloud services. It delivers powerful new layers of security along with innovations to elevate your business to new levels of efficiency and

productivity. Windows Server 2016 paired with HPE servers, storage, and networking solutions provides the technology that helps achieve your business goals. For available Part Numbers, please click on the QuickSpecs document available at the right section of this webpage.

FEATURES

Featured Characteristics

Safeguard your data whether on-premise or in the cloud – helping mitigate risk and avoid business disruption. Features such as Windows Defender, Trusted/Secure Boot, Shield VMs, and Host Guardian Services are just a few of the additional layers of security offered in Microsoft Windows Server 2016.

Increase ROI IT investments with flexible storage solutions, such as Storage Replica, Storage Spaces Direct, and Rolling Cluster OS Upgrades to deliver increased efficiency data protection.

Meet business requirements for scaling applications quickly and provides enterprise level security with Windows Server Containers and Hyper-V Containers. Ideal solutions whether in private, hybrid, and private Cloud environments.

Prevent risks associated with compromised administrative credentials. Use new privileged identity management features to limit access to “just enough” and “just in time” administration.

Windows Server Containers bring the agility and density of containers to the Windows ecosystem, enabling agile application development and management. Use Hyper-V Containers for a unique additional level of isolation for containerized applications.
