

NVIDIA HPC SDK Compiler Support Services

NVIDIA HPC SDK Premium Compiler 1-year Support (R7F98AAE)

NVIDIA®

What's new

- Professional support for the HPC compilers, specifically the NVFORTRAN, NVC++, and NVC compilers.
- HPC Compiler Support Services provide end customers with direct NVIDIA support and subject matter experts for compiler-related issues.

Overview

Are you a scientist, researcher, or an HPC programmer at a national laboratory, research university, or a commercial organization who develops modeling and simulation applications in weather forecasting, climate modeling, high-energy physics, materials science, computational chemistry, computational biology, computational fluid dynamics, structural analysis, astrophysics, geophysical sciences, and similar fields?

Hewlett Packard Enterprise partners with NVIDIA to provide compiler support for those who utilize the NVIDIA HPC Software Development Kit. HPC SDK Compiler Support Services (HCSS) provide enterprise-grade support for the HPC compilers within the NVIDIA HPC SDK, specifically the NVFORTRAN, NVC++, and NVC compilers.

Features

Peace of Mind

NVIDIA HPC Software Development Kit (SDK) support services provide enterprise-grade support to be there when you need it so you can focus your efforts on development.

NVIDIA HPC SDK support services provide access to release archives including both HPC SDK and legacy PGI packages.

With confirmation of bug reports, prioritize bug fixes above those from non-paid users for increased time efficiency.

Direct Access to Experts

NVIDIA HPC Software Development Kit (SDK) features support contract directly with NVIDIA, so you can easily submit service request with a clear escalation path.

Premium support provides end customer with a named HPC technical contact.

Training Support

NVIDIA HPC Software Development Kit (SDK) features premium support, so you can further develop your team's skills through virtual trainings.

A simplified UX facilitates increased ease of use and increased productivity.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

[Advisory & Professional services](#)

Experts can help you map out your path to hybrid cloud and optimize your operations.

[Managed services](#)

HPE runs your IT operations, giving you unified control, so can focus on innovation.

[Support services](#)

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

[Lifecycle Services](#)

Address your specific IT deployment project needs with tailored project management and deployment services.

[HPE Education Services](#)

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
