

NVIDIA Virtual GPU Software

NVIDIA®

What's new

- Hewlett Packard Enterprise offers NVIDIA AI Enterprise to help you reduce complexity while building and maintaining your cloud-native AI software platform.

Overview

Does your high-performance computing (HPC) / artificial intelligence (AI) environment need virtual GPU (vGPU) capability?

The NVIDIA® Virtual GPU Software enables GPU performance for workloads ranging from graphics-rich virtual workstations to data science and AI, enabling IT to leverage the management and security benefits of virtualization. By making GPU performance possible for every virtual machine (VM), the vGPU technology helps users to work more efficiently and productively from the data center to the cloud.

Are you looking to reduce cost and complexity of the AI lifecycle?

NVIDIA AI Enterprise addresses the complexities of organizations trying to build and maintain their own high-performance, secure, and cloud-native AI software platform. Use pre-trained and customizable models to streamline

development and deployment to better results with lower costs.

Features

NVIDIA AI Enterprise: The End-to-End Software Platform for Production AI

NVIDIA vGPU Software can dramatically increase data processing time with the NVIDIA RAPIDS Accelerator for Apache Spark.

Provide valuable data quickly by creating custom, accurate models in hours by using NVIDIA TAO Toolkit and pretrained models.

Accelerate performance with NVIDIA TensorRT that delivers low latency and high throughput for inference applications.

Simplify and optimize the deployment of AI models at scale and in production with NVIDIA Triton Inference Server and NVIDIA Triton Management Service.

vGPU Software for Every Workload

NVIDIA Virtual GPU Software features NVIDIA RTX Virtual Workstation (vWS) for creative and technical professionals using graphics applications.

NVIDIA Virtual PC (vPC) can easily create virtual desktop infrastructure (VDI) for knowledge workers who use office productivity applications and multimedia.

NVIDIA Virtual Applications (vApps) simplify streaming with Remote Desktop Session Host (RDSH) solutions.

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

[The Defective Media Retention \(DMR\)](#) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. [Comprehensive Defective Material Retention \(CDMR\)](#) allows you to keep all data retentive components.

HPE GreenLake

[HPE GreenLake edge-to-cloud platform](#) is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
