

Pensando Offerings

Pensando Distributed Services Platform DSC-25 Enterprise 10/25Gb 2-port SFP28 Card (P26966-B21)

Overview

Do you need edge acceleration in your data center? The Pensando Distributed Services Platform for Hewlett Packard Enterprise servers provides a powerful suite of software-defined services like firewall, encryption, and tunnelling directly to the server which dramatically boosts network and security performance by moving those services to the server edge, where the transition between network and server occurs

This revolutionary approach eliminates the need for an assortment of discrete appliances throughout the data center by integrating networking and security functions into a single device residing in a single server, tightly coupling policies to just that server and its users. No longer are server and user demands queuing behind unrelated demands on shared appliances. Coincidentally, because the functions are resourced at the server edge, performance and capacity scaling are incremental, observability is pervasive and granular, and latency is significantly reduced.

Features

Always-on Telemetry and Deep Observability

Pensando Distributed Services Platform brings sophisticated wire-speed telemetry to HPE servers, providing real time observability and insights for network and storage, without affecting application performance.

Always-on telemetry at the server edge enables proactive end-to-end troubleshooting and problem reporting, minimizing down-time and significantly reducing mean time to repair (MTTR).

Micro Segmentation for KVM and Containerized Application Tiers

The Pensando Distributed Services Platform isolates KVM/Hyper-V and containerized application tiers from each other on Hewlett Packard Enterprise servers and achieves “zero-trust security” enforced within each machine by the Pensando Distributed Services Card (DSC).

Microsegmentation can be applied – per VM, container, or workload – on the DSP subsystem with full isolation from host-based vulnerabilities.

Distributed Stateful Firewall for Bare-Metal, KVM, and Containerized Environments

Pensando DSP enables policy enforcement and permitted list communications between servers within the data center (East-West security).

Pensando DSC implements an enterprise-class, centrally managed stateful firewall at each server edge.

Advanced firewall functionality includes Application Layer Gateway (ALG), and packet-based DDoS attack protection (Flood, TCP SYN, fragmentation, Ping-of-Death (PoD), and more).

Simplified Infrastructure Operations

Pensando DSP eliminates multiple discrete network and security appliances such as an East-West stateful firewall.

Eliminates complexity and latency associated with network tromboning-effect through multiple appliances.

A simplified architecture and always-on visibility results in fewer outages and faster mean time to repair (MTTR).

Replaces multiple appliances, reducing costs and complexity, all while improving security.

Pensando DSP lowers total cost of network and security services per server.

Technical specifications	Pensando Distributed Services Platform DSC-25 Enterprise 10/25Gb 2-port SFP28 Card
Product Number	P26966-B21
Port speed	25 Gb
Number of ports	2
Bus type	PCIe Gen3 x8
Connector type	2xSFP28 and RJ45
Form factor	Standup PCIe, Half-height half-length
Supported cables	HPE 25GbE SFP28 to SFP28 3m Direct Attach Copper Cable, HPE 25GbE SFP28 to SFP28 5m Direct Attach Copper Cable, HPE 25GbE SFP28 to SFP28 7m Active Optical Cable, HPE 25GbE SFP28 to SFP28 15m Active Optical Cable, HPE 25Gb SFP28 SR 100m Transceiver
Compatible operating systems	Red Hat® Enterprise Server SUSE® Enterprise Linux Server VMware® vSphere ESXi Microsoft® Windows® Server
Power	25 W maximum 21 W typical use
License type	E-RTU
Support coverage	24x7 and 5, 4, 3, and 1 year Licenses
Subscription term	1, 3, 4, and 5 year terms
Weight	0.44 kg
Product dimensions	21.49 x 24.69 x 6.2 cm

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

GreenLake

[GreenLake](#) is the cloud to run and manage your entire hybrid landscape—private, public, and edge. It helps you to:

- Streamline IT Operations across compute, storage, and networking without the chaos
- Unify and secure data, as you move faster
- Accelerate AI, from pilot to production

The result: greater operational efficiency, lower TCO, and faster AI delivery—all from one unified, intelligent platform built for today's hybrid enterprise.
