WHAT'S NEW

- SUSE Linux Enterprise Server Unlimited VM with Live Patching.
- SUSE Manager Lifecycle Management Unlimited VM.

OVERVIEW

Are you looking for a reliable, scalable and multi-model Linux Operating System?

SUSE Linux Enterprise Server from HPE is a highly reliable, scalable, and secure server operating system, built to power

- Provides new and updated driver support, PCI IDs and hardware enablement.
- Installation without network using packaged media.
- Provides an easy transition to a wide range of IT needs with specialized modules and extensions.
- Support for multiple architectures and deployment scenarios on x86_64.

mission-critical workloads in both physical and virtual environments.

It is an affordable, interoperable, and manageable open source foundation. With it, enterprises can cost-effectively deliver core business services, enable secure networks, and simplify the management of their heterogeneous IT infrastructure, maximizing efficiency and value.

FEATURES

Comprehensive Solutions

Designed for interoperability, SUSE Linux Enterprise Server from HPE integrates into classical UNIX® and Windows® environments, supports open standard interfaces for systems management, and has been certified for IPv6 compatibility.

SUSE Linux Enterprise Server from HPE is backed by award-winning support from SUSE, an established technology leader with a proven history of delivering enterprise-quality support services.

SLES Unlimited VM now including Live Patching

Enterprise-class Technology

SUSE Linux Enterprise Server HPC from HPE offers reliability, availability, and serviceability (RAS) features designed to increase system up-time.

SLES High Availability (HA) and SUSE Linux Enterprise Live Kernel Patching are designed to manage cluster servers in data centers to help minimize data loss due to corruption or failure by protecting your data assets using your existing IT infrastructure and eliminate unplanned downtime.

Exceptional Value

SUSE Linux Enterprise Server products from HPE are certified and supported across the entire HPE Servers portfolio.

SUSE Manager helps enterprise DevOps and IT Operations teams reduce complexity and control IT assets with a single tool to manage Linux systems.

Comprehensive global services portfolio providing trusted and reliable support.

Faster, Smarter SAP HANA Deployment

HPE and SUSE are market leaders in infrastructure for SAP HANA with a broader portfolio offerings, including "as a service" options.

SUSE Linux Enterprise Server from HPE is optimized to deliver high-performance mission-critical services, edge of network, and Web infrastructure workloads for SAP application on HPE Servers Portfolio.
