## Overview

The Scripting Toolkit (STK) for Windows and Linux provide flexible scripting to automate steps in HPE ProLiant server configurations to scale high volumes of server deployments rapidly and cut deployment time substantially. The STK includes a modular set of utilities and documentation that describe how to apply the scripting tools for an automated deployment process.

It delivers hands-off, unattended installation for high volume HPE ProLiant server deployments and is integrated with other management tools such as Integrated Lights Out (iLO), BIOS and is based on Intelligent Provisioning. Its "Rack and Go" approach frees up scarce IT resources, delivers consistent server configurations across multiple servers, and integrates

into popular methods for operating system deployment. Past versions were based on SmartStart, and were known as the SmartStart Scripting Toolkit.

## Features

### **Scripting Capability for Deployment of High Volume ProLiant Server Installations**

Supports HPE ProLiant BL/ML/DL /SL,XL 100, 300, 500, 700, 800 series servers in both Windows and Linux environments.

Uses proven technology to provide consistent and reliable, high volume, server configurations.

32-bit and x64 Windows Toolkits are combined into a single deliverable.

### **Provides Advanced Multi-server Deployment for Technical Users**

Includes replication utilities to provide an easy way to create and apply server hardware, array, and iLO configuration script files.

Provides configuration files that provide a flexible way to edit standard hardware configuration files.

Enables the IT administrator to script server configuration files and link to the unattended installation tools of the operating system.

### **"Rack and Go" Unattended Installation Frees Up Scarce IT Resources**

Delivers consistent server configurations across multiple servers.

Documentation provided with how-to information and sample scripts.

Integrates into popular methods for operating system deployment.

### **Other Features**

Features for Linux and WinPE: USB, ISO, PXE, and Advanced scripting support

WinPE supports both Visual Basic and WMI

Password usability updates and Support for WinPE 10

For newer scripting functionality, use the RESTful Interface Tool, which takes advantage of the iLO RESTful API- and Redfish API conformance. To learn more, visit <http://www.hpe.com/info/resttool>

## HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

### Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

### Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

### Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

### Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

### HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

The Defective Media Retention (DMR) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. Comprehensive Defective Material Retention (CDMR) allows you to keep all data retentive components.

## HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
