OVERVIEW

The Scripting Toolkit (STK) for Windows and Linux provide flexible scripting to automate steps in HPE ProLiant server configurations to scale high volumes of server deployments rapidly and cut deployment time substantially. The STK includes a modular set of utilities and documentation that describe how to apply the scripting tools for an automated deployment process.

It delivers hands-off, unattended installation for high volume HPE ProLiant server deployments and is integrated with other management tools such as Integrated Lights Out (iLO), BIOS and is based on Intelligent Provisioning. Its "Rack and Go"

approach frees up scarce IT resources, delivers consistent server configurations across multiple servers, and integrates into popular methods for operating system deployment. Past versions were based on SmartStart, and were known as the SmartStart Scripting Toolkit.

FEATURES

Scripting Capability for Deployment of High Volume ProLiant Server Installations

Supports HPE ProLiant BL/ML/DL /SL,XL 100, 300, 500, 700, 800 series servers in both Windows and Linux environments.

Uses proven technology to provide consistent and reliable, high volume, server configurations.

32-bit and x64 Windows Toolkits are combined into a single deliverable.

Provides Advanced Multi-server Deployment for Technical Users

Includes replication utilities to provide an easy way to create and apply server hardware, array, and iLO configuration script files.

Provides configuration files that provide a flexible way to edit standard hardware configuration files.

Enables the IT administrator to script server configuration files and link to the unattended installation tools of the operating system.

"Rack and Go" Unattended Installation Frees Up Scarce IT Resources

Delivers consistent server configurations across multiple servers.

Documentation provided with how-to information and sample scripts.

Integrates into popular methods for operating system deployment.

Other Features

Features for Linux and WinPE: USB, ISO, PXE, and Advanced scripting support

WinPE supports both Visual Basic and WMI

Password usability updates and Support for WinPE 10

For newer scripting functionality, use the RESTful Interface Tool, which takes advantage of the iLO RESTful API- and Redfish API conformance. To learn more, visit <http://www.hpe.com/info/resttool>

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- Greenlake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
